Microsoft AI Proof of Value

Experience the Value of AI

POV OVERVIEW

Improving's Microsoft AI PoV is designed to help you identify goals and explore how Microsoft AI solutions can address specific business challenges. Through hands-on interaction and rapid prototyping, participants gain practical experience with Microsoft AI solutions and see the potential impact before moving into a full production rollout. This POV is designed for organizations seeking to validate AI concepts and experience the benefits of a tailored solution before a full-scale implementation.

POV OUTCOMES

- In-depth discovery of customer needs and solution requirements
- Hands-on interaction with Microsoft AI technologies (Copilot Studio and Azure AI Foundry)
- Rapid prototyping and demonstration of a solution for a real business challenge
- Actionable recommendations and roadmap for building out a full AI solution

Key Focus Areas:

- **Needs Assessment:** Identify business challenges and AI opportunities
- **Solution Design:** Map out and prototype Microsoft AI solutions tailored to customer goals
- **Technology Exploration:** Experience Microsoft AI tools in action
- **Vision Demonstration:** Showcase the potential of AI tooling for your organization

DURATION: 4-10 weeks

Week 1–2: Discovery & Design Workshops
Week 3–8: Prototype Development & Iterative Demos
Week 9–10: Final Demonstration, Documentation, and Roadmap
