Confluent Professional Services

Resilient & Modern Enterprise Event Streaming Architectures

YOUR TRUSTED PARTNER IN EVENT STREAMING ARCHITECTURES

Improving is a trusted and award-winning software consulting firm that is at the forefront of providing innovative and impactful services and solutions for our enterprise clients in North America. As a Confluent Premier Consulting & SI Partner, we work in partnership with Confluent to develop resilient event-streaming architectures for an array of enterprise clients across various industries. We are accelerating the event streaming journey for clients that include Fortune 25 companies by providing them with the expertise, training, and skills required to maximize the value of their Confluent implementations.

Leverage our comprehensive suite of Confluent services to transform your real-time data processing capabilities. As a seasoned Confluent partner, we offer end-to-end solutions ranging from Kafka consulting and strategy development to managed Kafka services and real-time data pipeline implementations, allowing you to tap into the full potential of this powerful event-streaming platform.

WHY LEVERAGE CONFLUENT FOR ENTERPRISE EVENT STREAMING

Confluent is a distributed streaming platform based on Kafka that enables enterprises to build real-time data pipelines, streaming applications, and event-driven architectures. Confluent has profoundly transformed the Banking, Retail, Insurance, Healthcare, IoT, Media and Telecom sectors through its complete and fully managed on-premise, hybrid, and multi-cloud enterprise data streaming solutions.

At Improving, we leverage Confluent Platform and Confluent Cloud to provide our clients with event streaming solutions that are:

- Highly elastic to meet any enterprise workload demand
- Capable of allowing infinite storage and scalability
- Guaranteed to have a high degree of resiliency
- Highly performant with low latency

Resilient & Modern Enterprise Event Streaming Architectures

OUR APPROACH TO KAFKA WITH CONFLUENT

Future-Proofing Kafka Deployments With Confluent

In an era where technology is rapidly evolving, future-proofing your Kafka deployments is essential. By helping you select the right technologies, such as Confluent Platform or Confluent Cloud, and advancing your team's skills, our experts at Improving will ensure that your enterprise's Kafka deployment remains robust and adaptable. Through our deep understanding of the real-time data ecosystem, our consultants will allow your team to extract the maximum value from Kafka, turning it into a powerful asset for your organization.

Transforming Your Staff into Kafka Experts

To harness the full potential of Kafka, your staff's expertise is crucial. Through dedicated training and mentoring, we aim to equip your team with a deep understanding of Confluent's capabilities. This education ensures they not only grasp how to effectively utilize the system but also maintain it for long-term success. By transforming your staff into Kafka experts, we solidify the foundation of your streaming platform.

Building a Sustainable Streaming Platform

Removing the guesswork from your Confluent deployment is key to building a sustainable streaming architecture. By integrating observability, we make your streaming platform not only efficient but also resilient. This approach allows for proactive management of your Kafka implementation and ensures that your architecture can adapt and grow with your needs.

WHY CHOOSE IMPROVING AS YOUR CONSULTING PARTNER

Our expertise is recognized by Confluent Professional Services consultants, and we're at the forefront of technical design and implementation for cloud, on-premises, and hybrid solutions. Our collaboration with clients extends beyond implementation; we empower them with the knowledge and tools to maintain their Kafka deployments. Notably, our contribution to developing Kafka Connectors highlights our integral role within the Confluent ecosystem. Our commitment to your team's long-term success is evident through our approach to delivery excellence. From establishing maintainable CI/CD pipelines for rapid and safe code deployment to developing end-to-end testing strategies, we ensure your team's confidence in their work. Choosing Improving for your Kafka deployment means partnering with a team whose expertise and commitment to client success will completely transform your real-time data capabilities.
