Our Data Streaming Expertise
Elevate Your Real-Time Data Streaming with Confluent & SAP

THE CHALLENGES OF DATA STREAMING

The enterprise data landscape is ever-changing - the focus on quality data is central to the data strategies of leading commercial and public sector organizations. Enterprises face a number of increasingly complex challenges in managing and leveraging real-time data. These strategic and operational challenges include eliminating data silos, tackling integration complexities with platforms such as SAP, and the need to develop and implement innovative and scalable solutions that can handle high volumes of data with low latency. Traditional data processing methods often fall short, leading to inefficiencies and missed opportunities for timely insights. This affects an enterprise's ability to leverage their data to make informed business decisions.

WHY CHOOSE IMPROVING FOR SAP DATA STREAMING & INTEGRATION?

At Improving, we are a **Confluent Elite Systems Integrator** and Confluent has certified Improving as a Premier Partner. Our goal in partnering with Confluent is to deliver enterprise data solutions that help you easily identify and use quality data. Our partnership with Confluent and SAP empowers us to build resilient event-streaming solutions that transform business operations through end-to-end solutions.
With deep expertise in Confluent's real-time data platform, we tailor deployments to diverse industry needs. Our certified team helps you stay agile, scale with ease, and drive innovation.

Our Data Streaming Services & Solutions For SAP
This partnership bridges the gap between operational events and enterprise decisions. Together, Confluent and SAP BTP & BDC solutions allow companies to:

- Harness the power of streaming data for faster innovation
- Build modern, scalable architectures aligned with data mesh and fabric principles
- Maximize ROI by enriching SAP applications with external, real-time data streams
- Stay agile in a constantly evolving digital landscape

Our Data Streaming Expertise
## Elevate Your Real-Time Data Streaming with Confluent & SAP

REAL-TIME DATA STREAMING PIPELINES INTO SAP

By combining the real-time streaming capabilities of Confluent with the enterprise data management and analytics strengths of SAP BTP & BDC, we enable customers to:

- Ingest and process data in real time for actionable insights
- Break down data silos and synchronize operational and analytical systems
- Power intelligent applications and planning with always-on, live data
- Streamline decision-making through automated event-driven processes

OUR APPROACH TO SAP DATA EXTRACTION

As a Confluent Elite Systems Integrator, we are at the forefront of data streaming and data engineering through our technical design and implementation for cloud, on-premises, and hybrid solutions. Our collaboration with clients extends beyond implementation; we empower them with the knowledge and tools to maintain their Kafka and Flink deployments. Access to data alone is not enough to make informed and impactful data-driven decisions; as technology and business leaders, you need to ensure you are using reliable, accurate, timely, and relevant data to make informed decisions.
