

GitHub Copilot Accelerator Workshop

Enhancing Developer Productivity and Workflow with Innovative AI Tools

Workshop Overview:

The GitHub Copilot Accelerator Workshop is a hands-on, expert-led engagement designed to help development teams quickly adopt and maximize the value of GitHub Copilot—Microsoft’s AI-powered coding assistant. Whether your team is new to AI-assisted development or looking to deepen their skills, our engagement provides the guidance, training, and real-world usage needed to increase adoption and effective usage by developers, driving impact.

Common Challenges Teams Face:

- Ineffective use of AI-powered coding tools due to limited knowledge
- Frustration with inaccurate AI-generated code
- Challenges managing AI-assisted development at scale

Workshop Takeaways:

- Introduction to GitHub Copilot’s features and supported environments
- Live demos showcasing key workflows and best practices
- Hands-on setup and paired programming for real-world application
- Expert guidance on managing GitHub Copilot organization-wide
- Explore GitHub Coding Agents to independently complete assigned issues in the cloud

Workshop Benefits:

- Increase developer adoption of AI coding tools
- Reduce repetitive tasks and increase coding efficiency
- Enable seamless collaboration and streamline team workflows
- Enhance projects to allow human and AI developer contributions

Ready to enable your developers with GitHub Copilot? Contact us at microsoft@improving.com to schedule your Accelerator Workshop and begin transforming your development lifecycle with AI-powered productivity.
