# Improving's Agentic Cloud Factory for Application Modernization

The fast, easy and secure way to migrate and modernize your legacy applications to Microsoft Azure

Agentic Cloud Factory Overview

Leveraging a cloud factory approach powered by Improving's IP solutions and agentic AI, organizations can modernize their legacy applications faster, more consistently, and at a lower cost. Standardizing and automating foundational steps, companies are able to reduce risk, improve reliability with predictable, repeatable results and can modernize their entire application estate at scale.

Business Benefits:

- Lower Costs & Improved Efficiency by as much as 50%
- Faster Time to Market
- Greater Scalability Across the Portfolio - whether it's dozens, hundreds or thousands of apps
- Higher Quality, Standardization and Security
- Reduced Risk & Higher Success Rates

Our Agentic Cloud Factory is ideal for organizations:

- Facing challenges with readiness and resource constraints
- With extensive and complex estates where manual assessments would take too long or be inaccurate
- Requiring practical and actional roadmaps

From strategy to modernization, optimization and on-going support, let Improving help guide and accelerate your modernization/migration efforts.
