Microsoft AI Discovery & Design Workshop

Accelerate Your Microsoft AI Journey with a Hands-On Session

WORKSHOP OVERVIEW

Improving's Microsoft AI Discovery & Design Workshop includes a series of interactive sessions to uncover your organization's goals, explore AI opportunities, and identify a high-level prototype solution. Through hands-on activities and expert guidance, participants gain practical experience with Microsoft AI tools and leave with a clear, actionable roadmap.

WORKSHOP TAKEAWAYS

- Identify business needs and AI opportunities
- Hands-on interaction with Microsoft AI technologies, including Copilot Chat, M365 Copilot, Copilot Studio and/or Azure AI Foundry
- Demonstration of potential solution
- Actionable roadmap and recommendations for next steps

Key Focus Areas:

- **Needs Assessment:** Identify business challenges and AI opportunities
- **Solution Design:** Map out potential AI solutions tailored to your goals and existing Microsoft investment
- **Technology Exploration:** Experience Microsoft AI tools in action
- **Next Steps Planning:** Define a clear path for implementation and value realization

Who Should Attend:

Designed for organizations looking to define their AI strategy, prototype solutions, and plan their journey.

Workshop attendees should be identified and grouped by similar roles and responsibilities (and decision scope) to encourage collaboration, solution sharing and actionable outcomes.

DURATION: 1 Week
