

Improving + Databricks: Accelerating Data-Driven Innovation

Modernizing data to fuel transformation

CORE CAPABILITIES

Improving is a strategic Databricks Consulting Partner helping enterprises unlock the full potential of their data. We specialize in scalable lakehouse architectures, AI/ML integration, and cloud-native solutions that drive measurable business outcomes.

Core Capabilities:

- **Platform Setup & Optimization:** Architecture design, cluster tuning, lakehouse deployment, cost control
- **Data Engineering & Pipeline Development:** Delta Lake, Apache Spark, batch/streaming workflows, data quality
- **AI/ML Services:** ML model development, MLflow, AutoML, feature engineering
- **BI & Analytics:** Real-time dashboards, data modeling, self-service analytics
- **Cloud & DevOps Integration:** Multi-cloud orchestration (AWS, Azure, GCP), secure connectivity
- **Governance & Compliance:** Unity Catalog, risk management, data security frameworks

ENGAGEMENT MODELS

-  **Discovery** (2-6 Weeks): Identify high-impact use cases & roadmap
-  **Construction** (6-9 Months): Build scalable platforms
-  **Migration** (3-6 Months): Seamless cloud transitions
-  **Governance** (3-4 Months): Enterprise-wide compliance
-  **Application Services** (3-6 Months): ML, BI, Data Engineering

Improving + Databricks: Accelerating Data-Driven Innovation

Modernizing data to fuel transformation

CLIENT SUCCESSES

- **Abbott:** Platform & AI/ML Implementation
- **Thrivent:** Enterprise Data Platform Migration
- **United Healthcare Group:** Self-Service Data & ML Platforms
- **Optum:** Data Governance & Platform Creation
- **Blue Cross Blue Shield:** AI/ML Platform Development
- **Chevron Phillips Chemical:** MLOps & Data Engineering
- **The Friedkin Group:** Platform Development; won 2025 Databricks Manufacturing Award

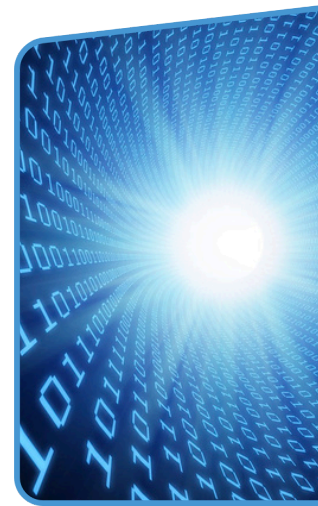

WHY IMPROVING + DATABRICKS

Key Benefits:

- 25% Reduction in Compute Costs
- 3X Faster Time to Production
- 100% Scalable Cloud Architecture
- Boost in Predictive Accuracy
- Faster Insight Generation
- Improved Data Freshness & Reliability

Additional Benefits:

- Greater Accountability & Transparency
- Enhanced Ethical Considerations
- Cost Management & Product Consistency
- Efficient Project Execution
- Strategic Alignment & Operational Efficiency
