

# Mainframe Modernization

Migrate and Modernize Your Legacy Mainframe Systems To The Cloud

## WHY MODERNIZE YOUR LEGACY MAINFRAME?

In today's rapidly evolving and increasingly complex digital landscape, legacy mainframe systems can become bottlenecks to innovation and agility. Modernizing legacy mainframes are a necessity for organizations looking to address many of the operational and strategic challenges stemming from scaling existing mainframe applications, system resilience, high maintenance costs, vendor lock-in, security and compliance, lack of automation, and a shrinking talent pool of Mainframe experts. By transitioning to a modernized cloud-native mainframe system, you can increase business agility, enhance scalability, improve security, and greatly reduce operational costs. Mainframe Modernization will enable your organization to leverage proven and cutting-edge technologies on leading hyperscalers, ensuring that your new system supports your current and future strategic and operational needs on the cloud.

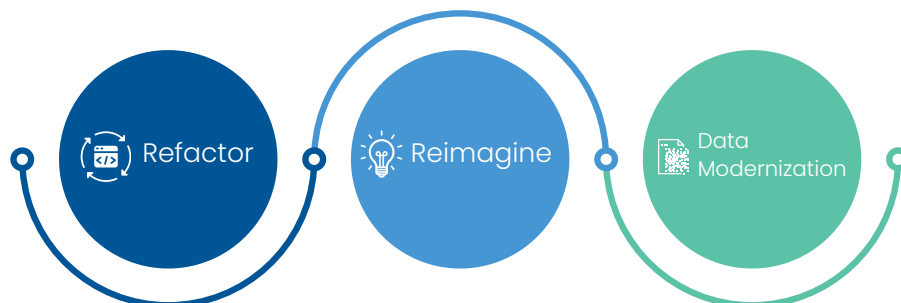

## BENEFITS OF MAINFRAME MODERNIZATION

A modern, scalable, and resilient mainframe application and optimized infrastructure offer a range of benefits to help your enterprise scale, innovate, and grow. These benefits include:

-  Better Scalability
-  Enhanced Security & Agility
-  Increased Cost Savings
-  Improved Reliability & Performance
-  Accelerated Innovation
-  Integration With Modern Technologies

## OUR APPROACH TO MAINFRAME MODERNIZATION

Our approach to Mainframe Modernization includes modernizing your legacy mainframe applications using our expertise in application modernization, enterprise cloud transformation, microservices architectures, domain driven design (DDD), and DevOps to **Refactor**, **Reimagine**, and **Modernize** your existing system:

# Mainframe Modernization

## Migrate and Modernize Your Legacy Mainframe Systems To The Cloud

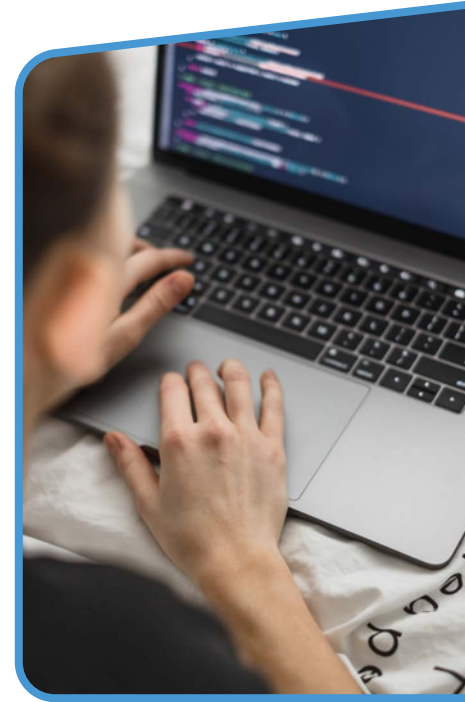

### MODERN MAINFRAME APPLICATIONS

From clients in the public sector to the insurance industry, Improving has been helping organizations usher in a new era of change with our expertise in software consulting, development, and training. Our expertise in mainframe modernization has helped many of our Fortune 50 clients migrate away from often outdated legacy mainframe systems that were costly and challenging to operate, maintain, and upgrade. With our extensive technical expertise in modern business applications, cloud transformation, data solutions, and infrastructure modernization, we are able to efficiently and effectively transform your legacy mainframe systems to resilient, scalable, and performant mainframe applications in the cloud.

#### Modernized Mainframes For Insurance - Protective Life

Using our expertise in Mainframe Modernization, we were able to provide Protective Life, a leading insurance providers in the US, with a modernized mainframe system that was highly resilient, scalable, performant, and responsive. Through extensive consultative work, Improving was able to migrate Protective Life’s legacy system to a modernized mainframe application in the cloud. In addition to providing architectural, engineering, and development expertise, Improving’s team leveraged a quality assurance (QA) methodology to ensure alignment between the new system and Protective Life’s strategic and operational needs.

### YOUR TRUSTED GLOBAL CONSULTING PARTNER

Our partnerships with AWS, Azure, and Google Cloud will ensure that your modernized mainframe application leverages powerful, reliable, sustainable, and innovative technologies on the cloud. Furthermore, our track record of helping enterprises completely transform their legacy systems through our expertise in mainframe modernization has allowed our clients to greatly improve their customer experiences, operational efficiency, system scalability, performance, and responsiveness, and profitability. Beyond these areas of improvement, our approach to software development, training, and consulting places an emphasis on developing trust with our clients. We do this by working closely with our client’s teams, fostering a supportive work culture, and adopting a delivery excellence model.
