

## Improving – Leaders In Helping The Public Sector Modernize Through Application & Infrastructure Modernization In The Cloud

### LEADING THE WAY IN DIGITAL TRANSFORMATION

Improving is a trusted leader in digital transformation, offering and applying top-notch expertise, methodologies, and technologies to help public sector organizations across Canada and the US successfully modernize their legacy systems. We take a comprehensive approach to digital transformation, leveraging industry-leading expertise and best-of-breed technologies to create fast, responsive and secure applications that are highly resilient and adaptable.

At Improving we are known for our expertise in leveraging Reactive Architecture, the Scala programming language, open source technologies, and platforms such as Akka to help public sector departments and agencies overcome their technology challenges. We have a diverse portfolio of public sector clients who have benefitted from our cutting-edge approach to digital transformation, resulting in optimized operations, increased efficiency, and improved customer experiences. Partnering with Improving will let you accelerate your organization's digital transformation journey, allowing you to keep up with the rapidly changing demands of today's digital landscape.

### A SECURE & SCALABLE PATHWAY TO THE CLOUD

To help public sector organizations modernize their legacy systems in a secure, cost-effective, and futureproof manner, we offer the following solutions that leverage best-of-breed cloud technologies:

- Cloud Landing Zones
- HPC & AI/ML Computing Portal
- Lift & Shift - VM & DB Migrations
- Document AI & Translation Services
- Modernization - Cloud-Native App Refactoring

## Improving – Leaders In Helping The Public Sector Modernize Through Application & Infrastructure Modernization In The Cloud

### OUR PARTNERS

We leverage our expertise in open-source technologies in all of the leading cloud platforms to provide your agency or department with a roadmap to application modernization that assures you can scale, grow, and innovate without limits. Improving is dedicated to collaborating with all levels of government across Canada to ensure that applications developed for Canadians are secure, responsive, reliable and future-proof. We partner with leaders in cloud technologies such as Google, Amazon, and Microsoft to guarantee that all solutions are built on a foundation that supports your goals.

### OUR PUBLIC SECTOR PROJECTS

From developing applications designed to help resettle Ukrainian refugees to creating a groundbreaking high-performance computing portal for some of Canada's leading researchers and agencies, our work in the public sector has allowed us to gain the expertise, familiarity and credibility to develop solutions that elevate how the public sector delivers services to Canadians from coast to coast. Our clients include Health Canada, Shared Services Canada, the Department of National Defence, Canada Post, the Governments of Ontario, Quebec, and New Brunswick in addition to other agencies and departments. Improving's approach always places the needs of our public sector clients first, where we create tailored solutions that align with all of our client's strategic goals and needs.
