

Nokia Lite Earbuds (BH-205)

Quick Start Guide

NOKIA

What's in the box

- Charging Case
- Earbuds (L/R)
- Ear Tips (S/M/L)
- USB Type-C cable
- Quick Start Guide

Product overview

1	Charging contacts (R)
2	Charging contacts (L)
3	Battery status LEDs
4	USB Type-C port
5	Touchpad
6	Microphone / LED indicator light
7	Ear tip

Power on

When you take the earbuds out from the charging case, the earbuds will turn on and pair with each other automatically. When they have successfully paired, the LED indicator light of the right earbud will flash blue and red alternately and the earbuds are ready to connect with your Bluetooth® device.

Pairing

- The LED indicator lights of the earbuds will flash blue when they are successfully connected with your Bluetooth device.
- After the initial pairing, the earbuds will automatically connect with your Bluetooth device whenever taken out of the charging case.

Charging

- ① Charge the charging case:
Connect the USB Type-C cable to a power source to begin charging. The battery status LEDs show the current battery status.

 Fully charged	● ● ● ●
 < 75%	● ● ● ○
 < 50%	● ● ○ ○
 < 25%	● ○ ○ ○

- ② Charge the earbuds:
Earbuds LED indicator lights turn red when charging, and turn off when fully charged. If the earbud is low in battery power, the LED indicator light will flash red every 5 seconds.

Charging	● red
Fully charged	○ off
Low battery	⚡ red / 5 secs
Low battery shut down	⚡ red x2 → ○ off

Troubleshooting

Problem	Reason	Solutions
Unable to turn on earbuds	Battery is low	Charge the earbuds for 1.5-2 hours and restart the earbuds
No sound after paired	Not pairing properly	Pair the earbuds again or reset the earbuds
Turn off automatically	Battery is low	Charge the earbuds for 1.5-2 hours
Failing to charge	Error with power supply	Perform a hardware reset
No light on the case during charging	Error with power supply	Check whether the charging cable is plugged in. Ensure the switch button is turned on.
Hearing echoes	Volume is too loud or the environment is too noisy	Adjust the volume or go to a quieter place
Having noise during a call / Sound skips frequently	Environment interference caused or distance between earbuds and mobile is too far	Change locations or reduce the distance between the earbuds and devices
Sound is too soft	Low volume	Increase the volume
Cannot turn on the earbuds after taken out from the charging case	Charging case is low in battery	Charge the earbuds and the charging case for 2-2.5 hours

You can use a single earbud. If the earbuds have been paired with your Bluetooth device before, it will automatically connect with your device when taken a single one out of the charging case.

Product and safety information

Remote control functions may vary depending on the model of your device and application. Sound track instructions do not respond to iOS devices. Since devices with Bluetooth wireless technology communicate using radio waves, they do not need to be in direct line-of-sight. Bluetooth devices must, however, be within 10 meters (33 feet) of each other, although the connection may be subject to interference from obstructions such as walls or from other electronic devices.

Frequency Band: 2400 MHz - 2485 MHz

For your safety

Important: Read these simple guidelines. Not following them may be dangerous or against local laws and regulations. For further info, read the complete user guide.

Switch off in restricted areas

 Switch the device off when a Bluetooth headset use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

Interference

 All wireless devices may be susceptible to interference, which could affect performance.

Batteries, chargers, and other accessories

 Use only batteries, chargers, and other accessories approved by HMD Global Oy for use with this device. Do not connect incompatible products.

Protect your hearing

 To prevent possible hearing damage, do not listen at high volume levels for long periods.

Hearing

 Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Small children

 Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

Take care of your device

Handle your device with care. The following suggestions help you keep your device operational.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits.
- Do not use or store the device in dusty or dirty areas.
- Do not store the device in high temperatures. High temperatures may damage the device or battery.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.
- Do not open the device other than as instructed in the user guide.
- Do not drop, knock, or shake the device or the battery. Rough handling can break it.
- Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint the device. Paint can prevent proper operation.

Recycle

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Electrical and electronic products contain a lot of valuable materials, including metals (such as copper, aluminium, steel, and magnesium) and precious metals (such as gold, silver, and palladium). All materials of the device can be recovered as materials and energy.

Crossed-out wheelee bin symbol

The crossed-out wheeled bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products and batteries must be taken to separate collection at the end of their working life.

Do not dispose of these products as unsorted municipal waste: take them for recycling. For info on your nearest recycling point, check with your local waste authority.

Battery info

Your device has an internal, non-removable, rechargeable battery. Do not attempt to remove the battery, as you may damage the device. The battery can be charged and discharged hundreds of times, but it will eventually wear out. Charging time can vary depending on device capability.

Battery safety

If left unused, a fully charged battery will lose its charge over time. Always keep the battery between 15°C and 25°C (59°F and 77°F) for optimal performance. Extreme temperatures reduce the capacity and lifetime of the battery. A device may temporarily stop working if its battery is too hot or too cold.

Do not dispose of batteries in a fire as they may explode. Obey local regulations. Recycle when possible. Do not dispose as household waste. Use the battery for its intended purpose only. Improper use of, or use of unapproved or incompatible, batteries may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery is damaged, take it to a service centre or your local shop before continuing to use it. Never use a damaged battery. Do not charge your device during a lightning storm.

Implanted medical devices

To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and the implanted medical device. Persons who have such devices should:

-
- Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
-
- Not carry the wireless device in a breast pocket.
-
- Switch the wireless device off if there is any reason to suspect that interference is taking place.
-
- Follow the manufacturer directions for the implanted medical device.
-

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

FCC statement

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Copyrights and other notices

The availability of products, features, apps, and services may vary by region. For more info, contact your dealer or your service provider. This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.
