* Best Performance

General guide only. Performance estimate based on moisture extraction rate. As example, Compressor Dehumidifiers more effectively remove moisture in temperatures above 20°C.

** Humidistat – Manual or Electronic

The manual humidistat consists of a control dial to turn the dehumidifier on/off and presets the unit to the desired approx. humidity level. The electronic humidistat consists of push button controls with an electronic display depicting variable humidity settings, as well as room temperature, humidity & timer.

Specifications and designs are subject to change without notice for further improvements
This brochure should be read in conjunction with the Ausclimate website.

*** Auto Defrost

The auto defrost feature enables the dehumidifier to function in cool indoor climates by thawing the ice that may form on the dehumidifier's cold coils – fan aids the thawing process in electronic models.

¹The **Hot Gas Defrost** unique system rapidly speeds up the thawing process by warming the dehumidifier's cold coils, allowing it to function more effectively in cool indoor climates.

²The **Ceramic Heater** unique heating system speeds up the dehumidifying process by warming the rooms & therefore allowing the dehumidifier to function more effectively in cool indoor climates.
