

Reinventing the way
fleets get their fuel.

Easy to see the benefits, even easier to use.

At a time when most businesses and organisations are looking at quick ways to cut costs and trim – we offer some low-hanging savings.

How we make it easy for you:

Simple to set up and manage

- » Our entire service is managed via the HaloGo smartphone app – iOS or Android
- » Bookings can be made with minimal notice or up to 14 days in advance and even set to recurring for greater convenience
- » Once you have created your secure account, use the app to:
 - Schedule bookings and make bookings
 - Track a delivery
 - Track fuel expenditure and usage in real time via the dedicated fleet/business portal
 - Add a vehicle
- » We offer a range of flexible, secure payment options via debit card, Visa, MasterCard, AMEX and Caltex StarCard
- » Once a vehicle has been associated to a business employee, that employee can book HaloGo to fill their business vehicle directly within the app, with charges going back to the company (either via monthly invoice, or credit card)
- » It also allows customers to separate their business account from their personal account
- » You can be assured that your billing information and account details are managed with the highest security and privacy
- » The app retains the history so it's easy when it comes to expense reporting
