

## Beyond Smart: Modernize for tomorrow's Autonomy

Modernization is the first step. Autonomous is the destination.

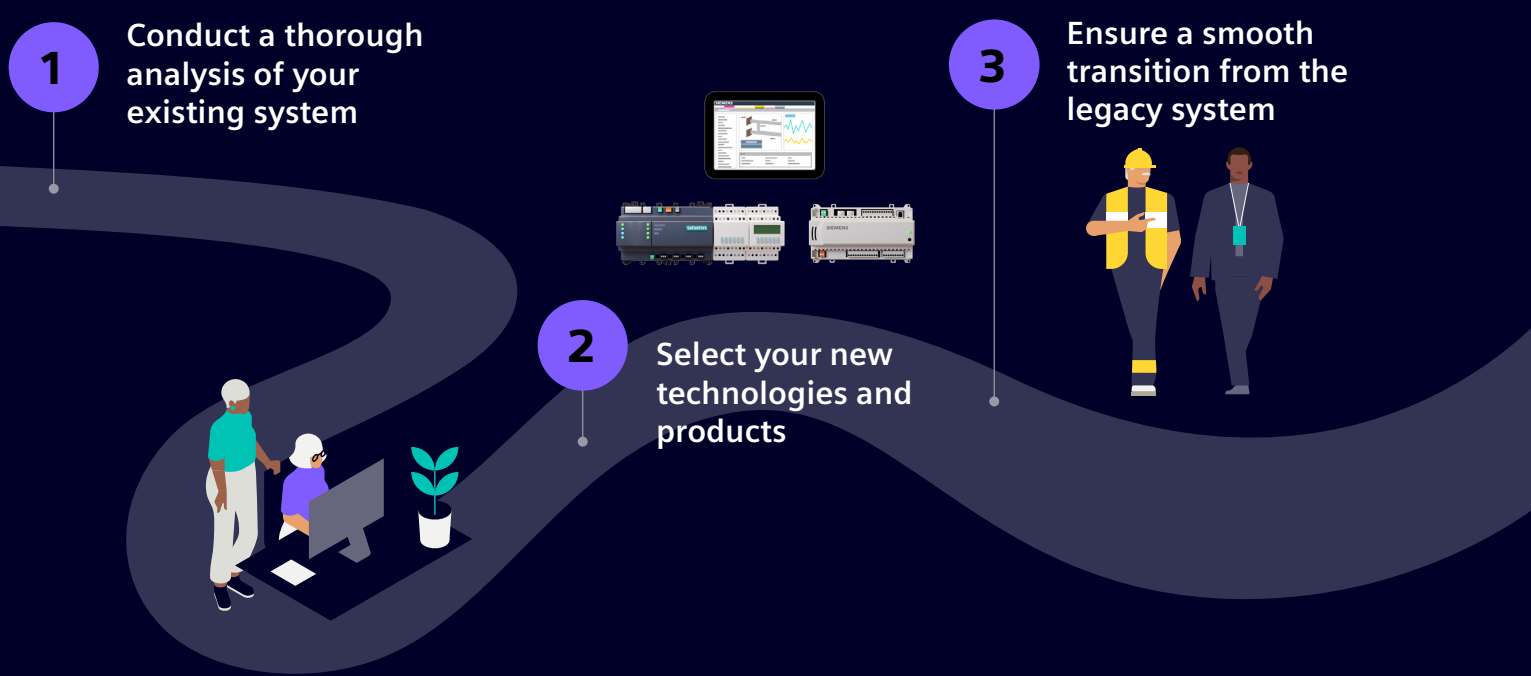

### Is your legacy BAS holding you back?

You're not alone. Legacy systems introduce hidden risk every year:

- Higher operating costs
- Cybersecurity exposure (avg. breach: \$4.5M)
- Limited technology integration
- Fragmented systems increase maintenance and labor costs

### The Desigo Modernization Pathway makes modernization easier and lowers risks.

### An open, flexible, integrated platform takes modernization beyond smart.

#### Building Management System (BMS)

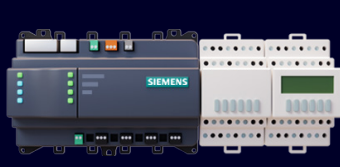

##### Desigo CC

- Open integration
- Scalable architecture
- Advanced visualization

Verified by UL Solutions for Smart System  
Verified PLATINUM

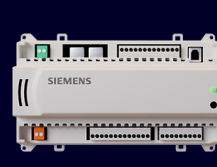

#### Primary Automation

##### PXC Controllers and Extension I/O

- BACnet Secure Connect
- Modular I/O
- Seamless integration

#### Room Automation

##### DXR

- Smart room-level control
- Optimize energy and comfort

#### Data Platform

##### Building X

- Integrates software, hardware and service
- Open, secure and versatile environment

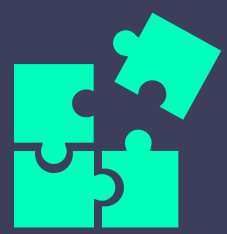

### It's a path that works at every layer – so you can benefit immediately.

**Increase operational efficiency** with advanced applications

**Reduce risk exposure** with modern cybersecurity

**Simplify the BAS** of even the most complex buildings
