

These Academic Supplemental Terms (“**Academic Terms**”) amend the Universal Customer Agreement (“**UCA**”) or End User License Agreement (“**EULA**”) between Customer and SISW solely with regard to the Offerings and Products which have been assigned the alphanumeric code “ACAD” on the Order (“**Academic Offerings**”). These Academic Terms, together with the UCA or EULA, as applicable, and other applicable Supplemental Terms form the agreement between the parties (“**Agreement**”). In the event of a conflict, these Academic Terms supersede any other Supplemental Terms, which supersede the EULA and UCA.

1. **DEFINITIONS.** Capitalized terms used herein have the meaning as defined elsewhere in the Agreement. The following additional definitions apply to these Academic Terms.

“**Academic Institution**” means a Customer that is an academic institution or other qualifying non-profit organization.

“**Student**” means a Customer who is an individual student who has purchased a valid Academic Offering for purposes of studies directly related to a diploma-seeking program.

2. **USE TERMS.** Academic Offerings also remain subject to all other applicable Supplemental Terms found at <https://www.siemens.com/sw-terms/supplements>, which are incorporated herein by reference. For Academic Institutions, Authorized Users will also include students enrolled into a diploma-seeking program at the Customer. Additional license and use types may be specified with respect to certain Academic Offerings as set forth in an Order.

2.1 **Limitations of Academic Offerings**

- (a) Customer will use the Academic Offerings solely for purposes directly related to:
 - (i) teaching, training, or instructing degree-granting programs;
 - (ii) studies and coursework as part of degree-granting programs;
 - (iii) research and development activities whereby all end results and research will be made available to the public or published in the public domain; or
 - (iv) performance of non-profit activities by Authorized Users, such as participation in student competitions, student projects or student demonstrations.

For the sake of clarity, the permitted activities mentioned under section 2.1(a)(iii) do not include any activities whereby the Customer is paid or compensated directly or indirectly to perform research and development services for the benefit of a third party, unless all end results and research of that third party’s research and development activities benefitting from the use of the Academic Offering are also made available to the public or published in the public domain.

- (b) Customer may not use Academic Offerings for (i) any training, or instructional endeavors for non-degree seeking students; (ii) any training or instructional endeavors for any third party that may be a licensee of the applicable Academic Offering under separate agreement with SISW; (iii) production or any commercial purpose, including but not limited to, commercial processing, paid-for consulting, or processing the work of any affiliates; (iv) developing software for license or sale; and (v) any benchmarking or competitive analysis against software developed by SISW’s competitors.
 - (c) Academic Offerings are only made available to Academic Institutions and Students. Any Customer which is not an Academic Institution but offers apprenticeships to students for the purpose of a diploma-seeking program may submit a request to purchase Academic Offerings from SISW for use by any such students. SISW will at its sole discretion evaluate the request and, if approved, will deem such Customer an Academic Institution solely for the purpose of granting an Academic Offering for use by such students for the duration of their apprenticeship at that Customer. All other terms and conditions contained in these Academic Terms remain applicable.
- 2.2 **Conditions of Academic Offering.** Customer agrees that (i) Customer will obtain advance written approval from SISW for all documents intended for publication by Customer which concern the use of the Academic Offering; (ii) upon request and at no cost, Customer will provide SISW copies of theses, dissertations and scholarly papers which concern the use of the Academic Offering insofar as such disclosure does not cause Customer to lose any applicable patent rights, and SISW may use such information as it sees fit; and (iii) all software programs and associated documentation developed by Customer which interact and/or interface with the Academic Offering will be disclosed to SISW. Such programs and documentation will be made available to SISW in source code form upon request. Customer grants to SISW a nonexclusive, transferable, paid-up, royalty free license to use and/or market, distribute and modify any such software program, to the extent that this provision does not conflict with any pre-existing processing grant or contract applicable to such software and documentation. Where such pre-existing Customer grant or contract conflicts with this provision, the pre-existing grant or contract provision will take precedence over this provision, provided that SISW is notified in advance of such grant or contract restriction.

3. **SUPPORT AND MAINTENANCE SERVICES.** Cloud Services support and Software Maintenance Services for Academic Offerings are provided in accordance with the relevant terms specified in the other applicable Supplemental Terms, with the following deviations:

3.1 **Academic Institutions**

- (a) Software Maintenance Services and Cloud Services support included in an Offering or purchased separately by Customer, as applicable, are only provided to Academic Institutions, but not individual Authorized Users, between the hours of 8:00 a.m. and 5:00 p.m. in local time zones of the contiguous United States, Monday through Friday, excluding SISW observed holidays. Academic Institutions will designate a trained technical contact who will serve as a focal point for administering and resolving all Academic Institution requests

for support. The technical contact will use commercially reasonable efforts to solve Academic Institution problems or issues related to the Academic Offering prior to contacting SISW for assistance. The technical contact will forward all service requests to SISW and will also serve as the recipient of all on-site Maintenance Services and Cloud Services support.

- (b) Software Maintenance Services and Cloud Services support are provided only for the most current release of the Academic Offerings and consist of the following: (i) telephone support; (ii) bulletin board service in which Academic Institution may electronically log support requests and access release notes and software information; and (iii) updates and upgrades to the Software Academic Offerings, if and when made available by SISW. Upgrades will not include separate software modules or Cloud Services that are available at additional charge. Academic Institution will install all software updates within 30 days after receipt thereof, or at the end of Academic Institution current semester, whichever is later.

3.2 **Students.** An Academic Offering is granted to a Student without Maintenance Services or support of any kind.

4. **TERMS FOR PLM COMPONENT SOFTWARE DEVELOPMENT TOOLKIT PRODUCTS**

Customer is authorized to use SISW PLM Component software development toolkit products (such as Parasolid and D-Cubed) included in an Academic Offering (the “**Toolkits**”) to develop and maintain products which consist of a combination of Customer products with an embeddable component within the Toolkits (“**Integrated Products**”), without the right to sublicense. Such use shall be subject to the limitations described in Section 2.1 above. Except as allowed herein, Customer shall not (i) make the Toolkits or Integrated Products available, either in whole or in part, to any third party; or (ii) disclose any characteristics or technical capabilities of the Toolkits to any third party without the advanced written authorization of SISW. Notwithstanding any other provision contained in this Agreement, SISW will not provide any Software Maintenance Services or Cloud Services support for the Toolkits. However, Customer may report errors and bugs.

5. **WORK PRODUCT AND DATA.** Work product and other data created with Academic Offerings contain certain limitations that make the data unusable outside the educational use or public research area. If Customer combines or links data created with an Academic Offering with other data, then such other data may also be affected by these limitations. SISW has no responsibility or liability whatsoever resulting from Customer’s combination of data or linking data created with Academic Offerings with data otherwise created.

6. **PUBLIC INSTITUTIONS.** If Customer is an Academic Institution that is a public institution unable to agree to the Governing Law and Jurisdiction provision in the UCA or EULA, as applicable, due to mandatory law, the following will apply:

6.1 **Governing Law and Jurisdiction.** This Agreement will be governed by the laws of the state or province where the Academic Institution is located. All disputes arising out of or in connection with this Agreement will be subject to the exclusive jurisdiction and venue of the courts of the state or province where Academic Institution is located. The United Nations Convention on Contracts for the International Sale of Goods does not apply to this Agreement.

6.2 **Indemnification.** Any terms and conditions of the Agreement relating to the Customer’s indemnification of other parties will only be binding on the Customer to the extent permitted by the governing law.
