

# SITRANS Smart Condition Monitoring IQ Package Product Sheet

The SITRANS Smart Condition Monitor (SCM) IQ Package in combination with the Siemens Measurement Intelligence devices (SITRANS MS200 and the SITRANS CC220) and Other Devices connected to MindSphere offers an online solution to monitor the condition of your equipment. This assists in the optimization of maintenance tasks by reducing unplanned downtimes. SITRANS SCM IQ Package provides proper structuring, notification, visualization functionality and modelling capabilities with pre-defined machine learning algorithms. The SITRANS SCM IQ Package consist of the MindSphere applications SITRANS SCM IQ and SITRANS Anomaly IQ as well as selected MindSphere Resources which are required to access the Platform and to utilize these applications.

Prerequisites	
Connectivity	In order to use the SITRANS SCM IQ application, your Siemens Measurement Intelligence devices (formerly known as Siemens Process Instrumentation devices) and Other Devices must be connected to the Internet. The Siemens Process Instrumentation devices are using TLS (Transport Layer Security) encrypted data transfer over MQTT (Message Queuing Telemetry Transport). Other Devices need to be properly connected to the Platform. Connectivity is not part of our Services. It is your responsibility to provide, enable and maintain connectivity.
Web browser	A HTML 5 capable Internet browser with a screen resolution of 1920x1080 or higher is required (e.g. Google Chrome or Microsoft Edge). Google Chrome is recommended. Mobile devices are supported as well by using HTML5 capable Internet browsers.
Siemens Measurement Intelligence devices	The applications SITRANS SCM IQ and SITRANS Anomaly IQ support the following Siemens Measurement Intelligence devices: the Industrial Internet of Things (IIoT) multisensor SITRANS MS200 and the Bluetooth® data collector SITRANS CC220. Both devices must be in place to properly use the application. The SITRANS MS200 data will be processed and down sampled. The peak-to-peak values of the vibration measurements will be available as time series data in your MindSphere Tenant as Your Content. You are solely responsible for the selection, configuration, and onboarding of your Siemens Measurement Intelligence devices to the Platform.
Other Devices	If the use of Other Devices is intended in SITRANS SCM IQ you need to connect them to your MindSphere Tenant, make the data available as time series data and map the data to a MindSphere asset. You are solely responsible for the selection, configuration, and onboarding of Other Devices to your MindSphere Tenant.

Data access	To access and use the application, data stored in your existing Account (e.g. Base Environment or MindSphere Capability Package Account) may be accessed by the application.
-------------	--

## Description of SITRANS SCM IQ and SITRANS Anomaly IQ Applications

SITRANS SCM IQ application	<p>The major functionalities of the SITRANS SCM IQ application included in the SITRANS SCM IQ Package Base are:</p> <ul style="list-style-type: none"> <li>• Automatic creation of asset type SITRANS MS and agent SITRANS MS Connector to be used with Siemens Measurement Intelligence devices.</li> <li>• Automatic creation of the aspect type generic_scmiq_anomalydetection to be used with MindSphere assets of Other Devices.</li> <li>• Establishing connection to SITRANS MS200 and SITRANS CC220 devices.</li> <li>• Add or delete STRANS MS200 and SITRANS CC220 devices.</li> <li>• Mapping of SITRANS MS200 devices to MindSphere assets.</li> <li>• Configuration of Users and User groups which will receive e-mail notifications.</li> <li>• View the SITRANS MS200 data connected to the Platform: <ul style="list-style-type: none"> <li>▪ Temperature</li> <li>▪ X, Y, Z vibration data as peak-to-peak values</li> </ul> </li> <li>• Training of Prediction Models which will then be available for activation.</li> </ul> <p>The major functionalities of the SITRANS SCM IQ application included in the SITRANS SCM IQ Package Prediction Upgrade are:</p> <ul style="list-style-type: none"> <li>• Activate and manage the Prediction Models to detect anomalies of the equipment monitored by SITRANS MS200 or Other Devices (regarding reliability of the Prediction Models, see "Prediction Models" below).</li> <li>• Trigger notifications when anomalies are detected by the Prediction Models.</li> </ul>
SITRANS Anomaly IQ application	<p>The SITRANS Anomaly IQ application can be properly used only when Prediction Models are activated. Activation of Prediction Models can be done by activating the SITRANS SCM Package Prediction Upgrade within the SITRANS SCM IQ application.</p> <p>The major functionalities of the SITRANS Anomaly IQ application are:</p> <ul style="list-style-type: none"> <li>• View detected anomalies and assign them to specific Users, if needed.</li> <li>• Enter information for documentation of the detected anomalies which describe the incidence and the solution of the incidence.</li> <li>• Label the anomalies to take advantage of continuous classification of the detected anomalies.</li> <li>• Add labels for classification and approve them by an assigned reviewer.</li> </ul>

## Description of MindSphere Resources

The following MindSphere resources ("MindSphere Resources") are included in the SITRANS SCM IQ Package. These have been selected to ensure proper operation of SITRANS SCM IQ and SITRANS Anomaly IQ applications.

Base Environment	<p>The Base Environment provides you with a dedicated Account (also referred to as "Environment") on MindSphere. It enables you to login to your Account via the respective URL provided by us and is required for use of the application and MindSphere Resources.</p> <p>The Base Environment includes 1 Admin User and provides you with the following administration tools available on the MindSphere Launchpad:</p> <ul style="list-style-type: none"> <li>• Usage Transparency: provides information regarding your consumption of MindSphere Resources.</li> <li>• Agent Diagnostic: allows you to activate and deactivate agent logfiles and to access them.</li> <li>• Settings: allow managing Users, permissions, rights, roles, groups, Collaborations, and environment provider information. For every User, an individual login is required. Access policies are available only upon request.</li> </ul>
------------------	---

	<p>MindSphere sales representative or MindSphere Support to be contacted to enable use of access policies.</p> <ul style="list-style-type: none"> <li>• Asset Manager: use Asset Manager to onboard &amp; offboard agents to your Account; to configure assets, asset types and aspect types; to manage the Sharing of assets under a Collaboration between Accounts using Cross-Tenancy.</li> <li>• Upgrade: can be used to order available upgrades (incl. add-ons) to already Offerings; to get an overview of requested and completed upgrades; to manage pending upgrade requests (authorized Users only).</li> </ul> <p>The Base Environment provides you with the following connectivity “Connect your Things” capabilities as well:</p> <ul style="list-style-type: none"> <li>• To connect assets using own PC as a gateway with MindConnect Software Agent.</li> <li>• To connect individual hardware using MindConnect API services, MindConnect MQTT Services, MindConnect OPC UA PubSub Services and MindConnect Library.</li> <li>• To use MindConnect Hardware e.g. MindConnect Nano, MindConnect IoT2040, MindConnect IoT2050.</li> <li>• Zero touch onboarding using MindConnect OPC UA PubSub Services and MindConnect MQTT Services.</li> <li>• To maintain connected devices by using MindConnect Device Management Services.</li> </ul> <p>For more information regarding Connect your Things capabilities, please refer to the Product Sheet for MindSphere Capability Packages available at <a href="https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/MindSphere-Product-Sheets">https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/MindSphere-Product-Sheets</a>.</p>
Additional MindSphere Resources	<p>In addition to the Base Environment, the following MindSphere Resources are included in the SITRANS Smart Condition Monitoring IQ Package and its extensions:</p> <ul style="list-style-type: none"> <li>• Asset Attributes</li> <li>• File Storage</li> <li>• Time Series Data Ingest Rate</li> <li>• Time Series Data Storage</li> </ul> <p>For general descriptions of the MindSphere Resources listed above, please refer to the MindSphere <a href="#">Glossary</a>.</p>

<b>SITRANS SCM IQ Package Overview</b>	
Application subscription	SITRANS SCM IQ Package Base
Fee	See Order <sup>1</sup>
Billing cycle	Full amount in advance
<p>The application subscription allows access to the functionalities of the SITRANS SCM IQ application and the SITRANS Anomaly IQ application (if activated) as described above. The MindSphere Resources included in the SITRANS SCM IQ Package Base are suitable to establish maximum 3 connections between the SITRANS MS200 device and the Platform, to start 3 Prediction Models and to use 3 months of Training Time for Prediction Models.</p>	
SITRANS SCM IQ application (incl. connectivity of 3 MS200 and 3 Prediction Models)	✓
SITRANS Anomaly IQ application	✓
Base Environment <sup>2</sup>	✓
Asset Attributes	70
Time Series Data Ingest Rate	0.05 KB/s

Time Series Data Storage	5 GB
File Storage	1 GB
<b>Extension (for application)</b>	<b>SITRANS SCM IQ Package Prediction Extension</b>
	Usage-based
Fee	See usage-based list <sup>3</sup>
Billing cycle	Monthly in arrears
This extension can only be activated within the SITRANS SCM IQ application and allows you to use the functionalities of the SITRANS SCM IQ and SITRANS Anomaly IQ applications as described above. The SITRANS SCM IQ Package Prediction Extension includes the activation of 1 additional Prediction Model.	
<b>Extension (for application and MindSphere Resources)</b>	<b>SITRANS SCM IQ Package Sensor Extension</b>
	Usage-based
Fee	See usage-based list <sup>3</sup>
Billing cycle	Monthly in arrears
The SITRANS SCM IQ Package Sensor Extension contains the following additional MindSphere Resources and is suitable to establish 1 additional connection between the SITRANS MS200 device and the Platform. The SITRANS SCM IQ Package Sensor Extension includes 1 additional month of Training Time for Prediction Models (if activated). This extension can only be activated within the SITRANS SCM IQ application.	
Asset Attributes	14 additional Asset Attributes
Time Series Data Storage	1 GB additional Time Series Data Storage
Time Series Data Ingest Rate	0.01 KB/s additional Time Series Data Ingest Rate
<sup>1</sup> Subscription-based pricing is set forth in the Order; <sup>2</sup> You can decide if a Base Environment shall be created and provisioned to you as part of your SITRANS SCM IQ Package Base subscription or if the SITRANS SCM IQ Package Base (without a Base Environment) shall be added to an existing Account (Base Environment or MindSphere Capability Package Account). A Package can only be added to an existing Account if the Account and Package are hosted in the same data center location. If you decide to add various Packages to one existing Account, please note the following: The MindSphere Resources included in the various Packages will be combined under one Account; it is your responsibility to allocate the MindSphere Resources to the various Packages according to your needs. The combination of MindSphere Resources under one Account may lead to technical limitations in their accessibility and should therefore not exceed the limits set out under <a href="https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/technical-limitations">https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/technical-limitations</a> ; <sup>3</sup> Usage-based fees are set forth in the Price List for Offerings with Usage-based Fees available at <a href="https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/usage-based">https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/usage-based</a> .	

<b>General</b>	
Subscription Term	The standard Subscription Term for the application is 12 or 36 months, and extensions (excluding usage-based) are 12 months. The Subscription Term shall automatically renew if stated in the Order. Upon expiration of the Subscription Term for SITRANS SCM IQ Package Base without renewal, any extensions described herein will also be deactivated and cannot be used any longer.
Co-term (renewal and termination)	The Subscription Term for extensions (excluding usage-based extensions) will be co-termed with the Subscription Term of the application and therefore can be shorter than the standard Subscription Term. If an application subscription is terminated, the associated extensions will also be terminated at the same time.
Activation and deactivation of SITRANS SCM IQ Package Prediction Extension	During the Subscription Term of the SITRANS SCM IQ Package Base subscription you may activate or deactivate the SITRANS SCM IQ Package Prediction Extension at any time. The deactivation can be done by deselecting the Prediction Model functionalities from the selected asset in the SITRANS SCM IQ application.
Activation and deactivation of SITRANS SCM IQ Package Sensor Extension	During the Subscription Term of the SITRANS SCM IQ Package Base subscription you may activate the SITRANS SCM IQ Package Sensor Extension at any time. The deactivation of the SITRANS SCM IQ Package Sensor Extension can be done by you at any time if not in use with a SITRANS MS200 (disconnected).

Extensions (usage-based)	Upon activation and until deactivation of a usage-based extension described herein, the fee for the relevant extension is charged on a daily basis and billed monthly in arrears. For further details about calculation of usage-based fees please refer to Usage-based Calculation Methods for MindSphere Applications available at <a href="https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/app-usage-based">https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/app-usage-based</a> .
Payment terms	The fee for SITRANS SCM IQ Package Base subscription is fully charged in advance for the entire Subscription Term unless otherwise expressly provided in an Order. The fees for usage-based extensions are charged monthly in arrears.
Trial	SITRANS SCM IQ Package Base is available as a "Trial" version. The Trial term and conditions are defined in the MindSphere Supplemental Terms available on <a href="http://www.siemens.com/sw-terms/supplements">www.siemens.com/sw-terms/supplements</a> .
Service Level Agreement	The Monthly Availability for the SITRANS SCM IQ and SITRANS Anomaly IQ applications is at least 98%. Monthly Availability is defined in the Cloud Services Support and Service Level Framework available on <a href="https://www.siemens.com/sw-terms/sla">https://www.siemens.com/sw-terms/sla</a> .
Third-Party Terms	The Third Party Terms for SITRANS SCM IQ and SITRANS Anomaly IQ applications are made available via the following web links: <a href="https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/Third-Party-Terms">https://siemens.mindsphere.io/en/docs/Product-Descriptions-Overview/Third-Party-Terms</a> .
Support	Support is available in German and English via <a href="https://support.industry.siemens.com/">https://support.industry.siemens.com/</a> . Hours of operation are Monday through Friday, 8:00 am to 5:00 pm CET – excluding national and local holidays.

## Export Control Regulations

Applicable for SITRANS SCM IQ and SITRANS Anomaly IQ applications and MindSphere Resources.

AL	N
ECCN	N

## Security Information

General	In order to protect plants, systems, machines and networks against cyber threats, it is necessary that you implement and continuously maintain a holistic, state-of-the-art industrial security concept.
---------	--

## Definitions

Prediction Models	The Prediction Models are machine learning models applied to the raw data of the SITRANS MS200 or Other Devices. The machine learning model will predict anomalies of a specific asset while continuously monitoring the data of the SITRANS MS200 device. Even if the algorithms for the machine learning model are carefully selected, false positive and false negative anomalies can be detected, resulting in less reliable anomaly detection and notification. The result is also influenced by the input to the model that the User defines when applying data to train a machine learning model.
Siemens Measurement Intelligence devices	The Siemens Measurement Intelligence devices allow you to generate values as vibration in the x, y, and z axes, and temperature. The values are delivered from the IIoT multisensor SITRANS MS200 and will be transferred to the Platform with the Bluetooth® data collector SITRANS CC220 .
Other Devices	Other Devices are any device connected to the Platform where data is mapped to a MindSphere asset. Other Devices mapped to MindSphere assets are compatible with SITRANS SCM IQ within the following specifications:

	Min. sampling period for prediction and training	1 second
	Min. period between consecutive predictions	1 minute
	Max. number of aspect variables per model	20
	Supported datatypes for aspect variables used in anomaly detection	Boolean, int, long, double
Training Time for Prediction Model	The Training Time for Prediction Models is to select the data input for the machine learning model which usually represents an asset in its normal operation condition. The time selection is made in the SITRANS SCM IQ application but is limited to the available Training Time as per your subscription.	
General	Unless otherwise indicated, capitalized terms used in this document shall have the meaning given to them in this Product Sheet or elsewhere in the Agreement. You may also want to check our <a href="#">Glossary</a> .
