

DIGITAL INDUSTRIES SOFTWARE

Teamcenter Supplier Connect

Deliver world-class products with a tightly integrated supply chain

Benefits

- Simplify supplier integration with web-based access, tailored dashboards and direct CAD integration
- Accelerate product development with supplier inputs, providing access to updated product data accessible to suppliers and real-time visibility into updates
- Improve communication and collaboration by providing instructions, sharing responses, searching for data and requesting access

Summary

In today's competitive landscape, suppliers play a pivotal role in delivering high-quality products and services efficiently. As product complexity increases and time-to-market pressures intensify, integrating suppliers seamlessly into the product development process becomes imperative for success. Traditional supplier collaboration methods often fall short, leading to disconnected workflows and inefficiencies.

Using Teamcenter Supplier Connect enhances collaboration by bridging the gap between suppliers and original equipment manufacturers (OEMs) during the product development lifecycle. Using Teamcenter Supplier Connect streamlines supplier onboarding, cutting the complexities associated with managing hundreds or thousands of suppliers. By delivering real-time access to accurate data, you mitigate the risks of working with obsolete information, enhancing productivity for OEMs and suppliers. Teamcenter® software is part of the Siemens Xcelerator business platform of software, services and hardware.

Benefits *continued*

- Protect intellectual property data with multi-tiered data security, controlled data sharing and supplier anonymity
- Increase efficiencies by leveraging a familiar Teamcenter architecture for your supplier portal with potential for shared resources and economies of scale

**Securing your data**

Information security is paramount in today's data-driven environment. Using Teamcenter Supplier Connect enables you to prioritize data protection, addressing information technology (IT) departments' concerns about information security and export compliance regulations. Using Supplier Connect helps IT teams by simplifying the management of supplier collaboration tools, reducing the burden of architecture complexities and training requirements.

Features

- Leverages vendor management to facilitate data exchange with suppliers
- Manage suppliers, supplier data and parts
- Can be hosted on premises (inside or outside the firewall) or in the cloud
- Quickly find and share information with suppliers
- Connected to Teamcenter using multi-site data exchange
- It is integrated with computer-aided design (CAD), enabling direct collaboration with multi-CAD suppliers and browser-based access using the Active Workspace standard
- Supports flexible briefcase options for offline suppliers
- Export Administration Regulations (EAR)
