

# Genesis Program

## Siemens Digital Industries Software

Siemens Digital Industries Software, a business unit of the Siemens Digital Industries Division, is a leading global provider of product lifecycle management (PLM) and manufacturing operations management (MOM) software, systems and services, helping innovative global manufacturers more rapidly design better products.

Headquartered in Plano, Texas, engineers at Siemens Digital Industries Software work collaboratively with our customers to provide industry software solutions that help them achieve a sustainable competitive advantage by creating innovations that matter. With the resources of a large company and the energy of a software start-up, we provide a fulfilling, collaborative environment for creating world-class software. Our culture encourages creativity, welcomes fresh thinking and focuses on growth so our people, business and customers can achieve their full potential.

## Genesis program overview

We developed the Genesis Program to attract the best and brightest in the industry. It comprises 12 to 14 weeks of intensive training that provides new engineers with the tools and skills needed to contribute to customer projects. Hosted by our leadership and training teams, the program covers how-to topics that range from soft skills and customer-facing projects to implementation. After completing training, you will fill the software associate consultant position in one of our various office locations across the United States and begin working with customers to provide implementation and customization solutions that leverage our suite of software products. You will get the chance to interface with customers, build and maintain client relationships, and develop functional and application design specifications.

## Program requirements

- University graduate with a minimum 3.0 grade point average (GPA)
- Bachelor's degree in a computer science or engineering discipline
- Authorization to work in the United States without the need for current or future sponsorship by the company
- Willingness to relocate to one of our major Siemens Digital Industries Software offices for initial Genesis training
- Willingness to travel frequently
