

Strategic Student Program

Siemens Digital Industries Software

Siemens Digital Industries Software is a global leader in the growing field of product lifecycle management (PLM) and manufacturing operations management (MOM) software and services. Today, Siemens Digital Industries Software products manage or create more than 40 percent of the world's 3D data. We are a team, collaborating with clients to transform their innovation processes and fully leverage PLM. Our culture encourages creativity, welcomes fresh thinking and focuses on growth, so our people, our business and our clients can achieve their full potential.

Strategic Student Program overview

The Strategic Student Program is open to interns and co-ops interested in gaining practical work experience in the following majors:

- Computer Science
- Computer Engineering
- Mechanical Engineering
- Aerospace Engineering
- Marketing
- Sales

As a student in the program, you will be an integral part of the Siemens product development team. You will use your background to take on a role in software programming, product design,

project management, quality assurance, marketing, sales or applications engineering to bring about change and growth.

Through this program, you will receive mentoring and one-on-one sessions with our University Relations team. You will have the opportunity to attend our monthly "Student Power Hours" and other professional workshops. You will network with Siemens executives and world-class engineers and learn what it is like to work as part of a company that is solving manufacturing challenges in the area of product lifecycle management.

Our goal is to provide students with the opportunity to earn a full-time role upon graduation and completion of the program.

Our students

We are looking for students with a sincere desire for a career in software development who want to be part of a diverse, growing company. We will provide a platform for students to affect the future and to contribute to the success of the company, our customers and the world.

Over continuing rotating semesters, our students will become:

- Technically competent
- Capable of leading change efforts
- Strong communicators with interpersonal skills

Program requirements

- Must have and maintain a minimum 3.0 GPA
- Must be a currently enrolled undergraduate student
- Must be a U.S. citizen or Green Card holder eligible to work in the U.S. without sponsorship
