

# XHQ Operations Intelligence Software

Turning data into actionable information

## Taking control of the abundance of data

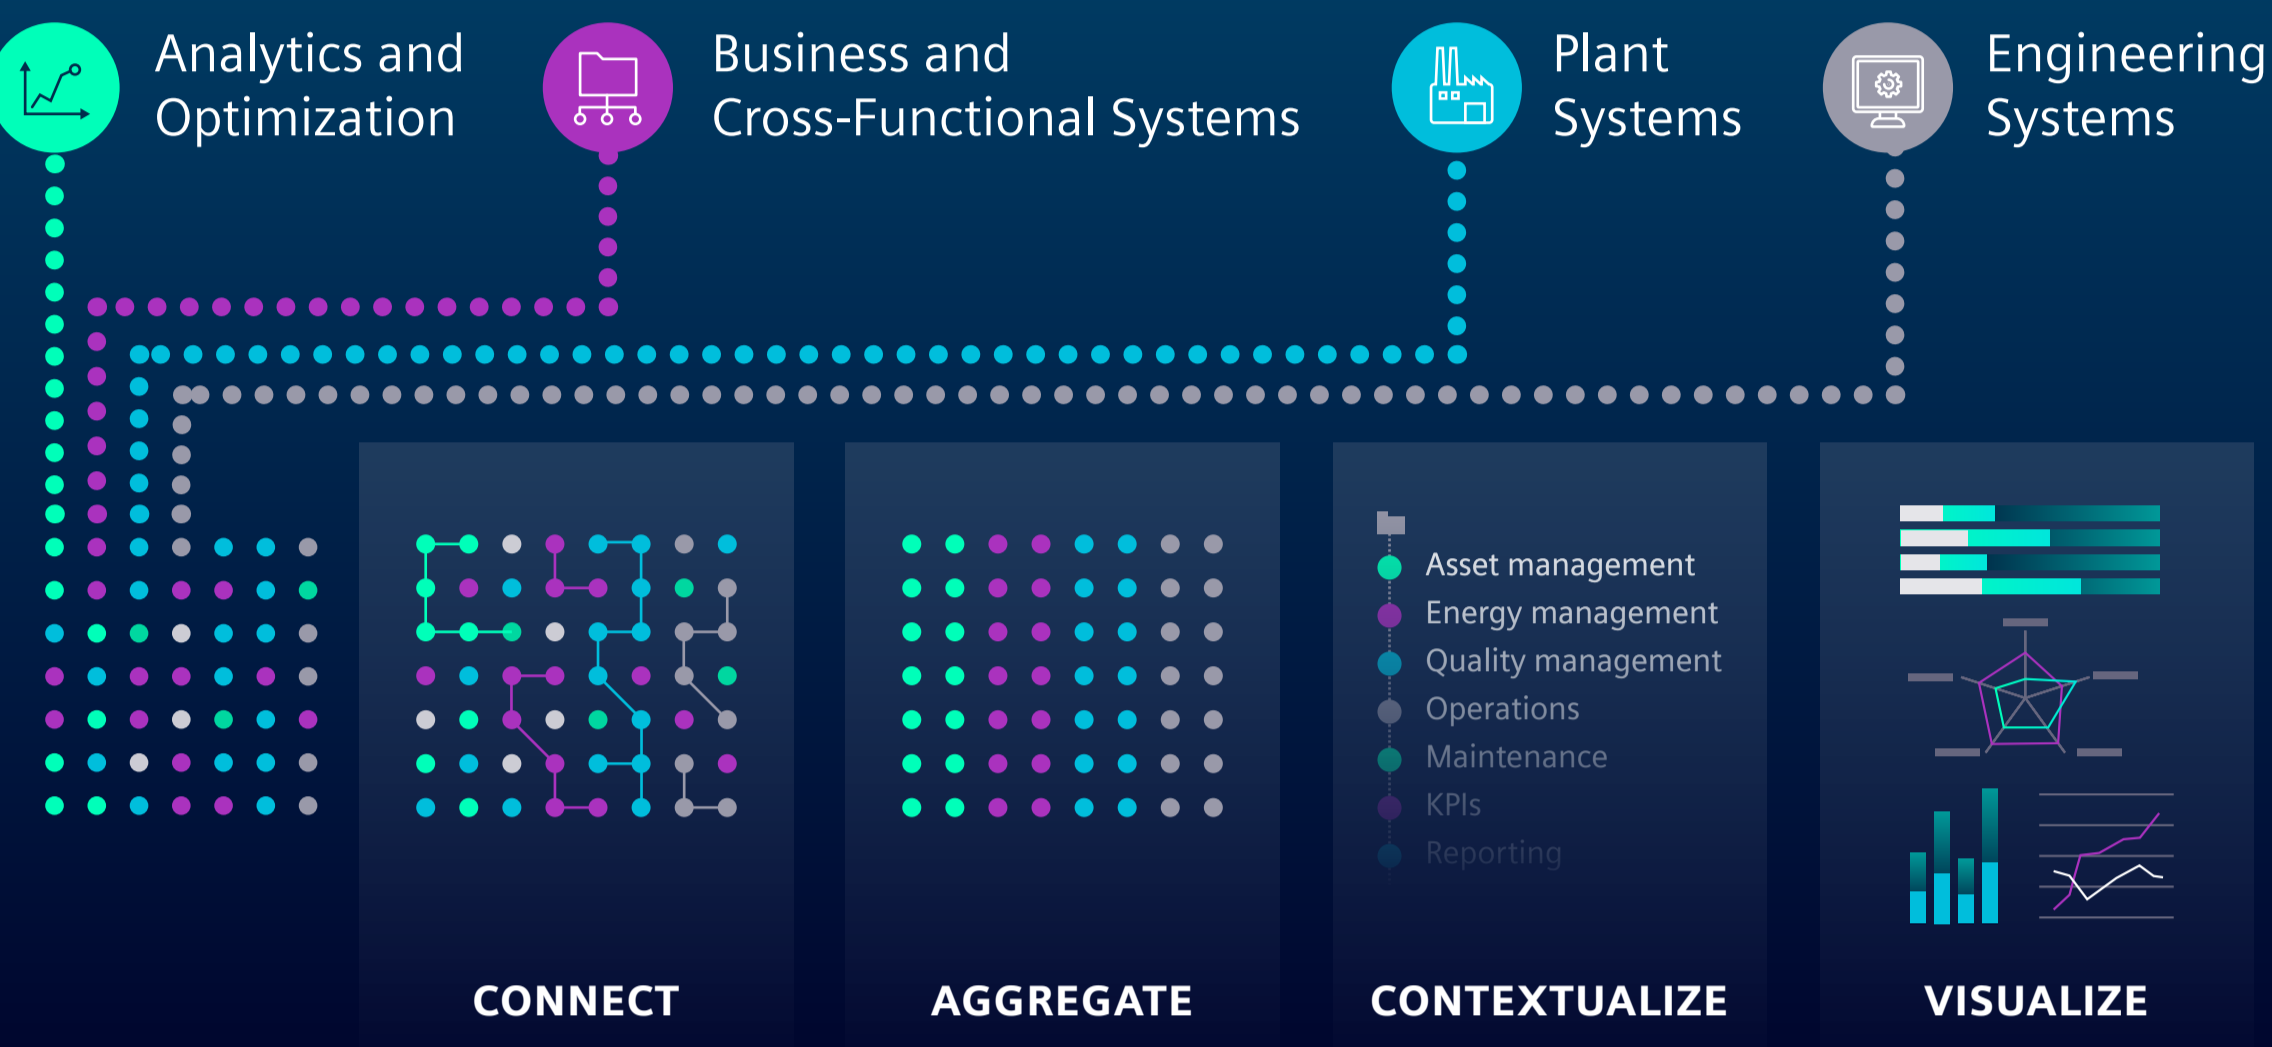

Countless amounts of data are generated every second in industrial plants into data silos. The operations intelligence software XHQ helps you derive tangible business value by visualizing this data in context and where needed.

- Access complex data in a simple way
- Make better decisions using real-time information
- Manage by exception
- Make use of data you already have
- Break down barriers between data silos
- Drive collaboration at all levels

## How it works

XHQ connects to a wide variety of sources, aggregates and organizes data, contextualizes it into a cohesive information model, and visualizes the result.

## Anytime, anywhere, any device

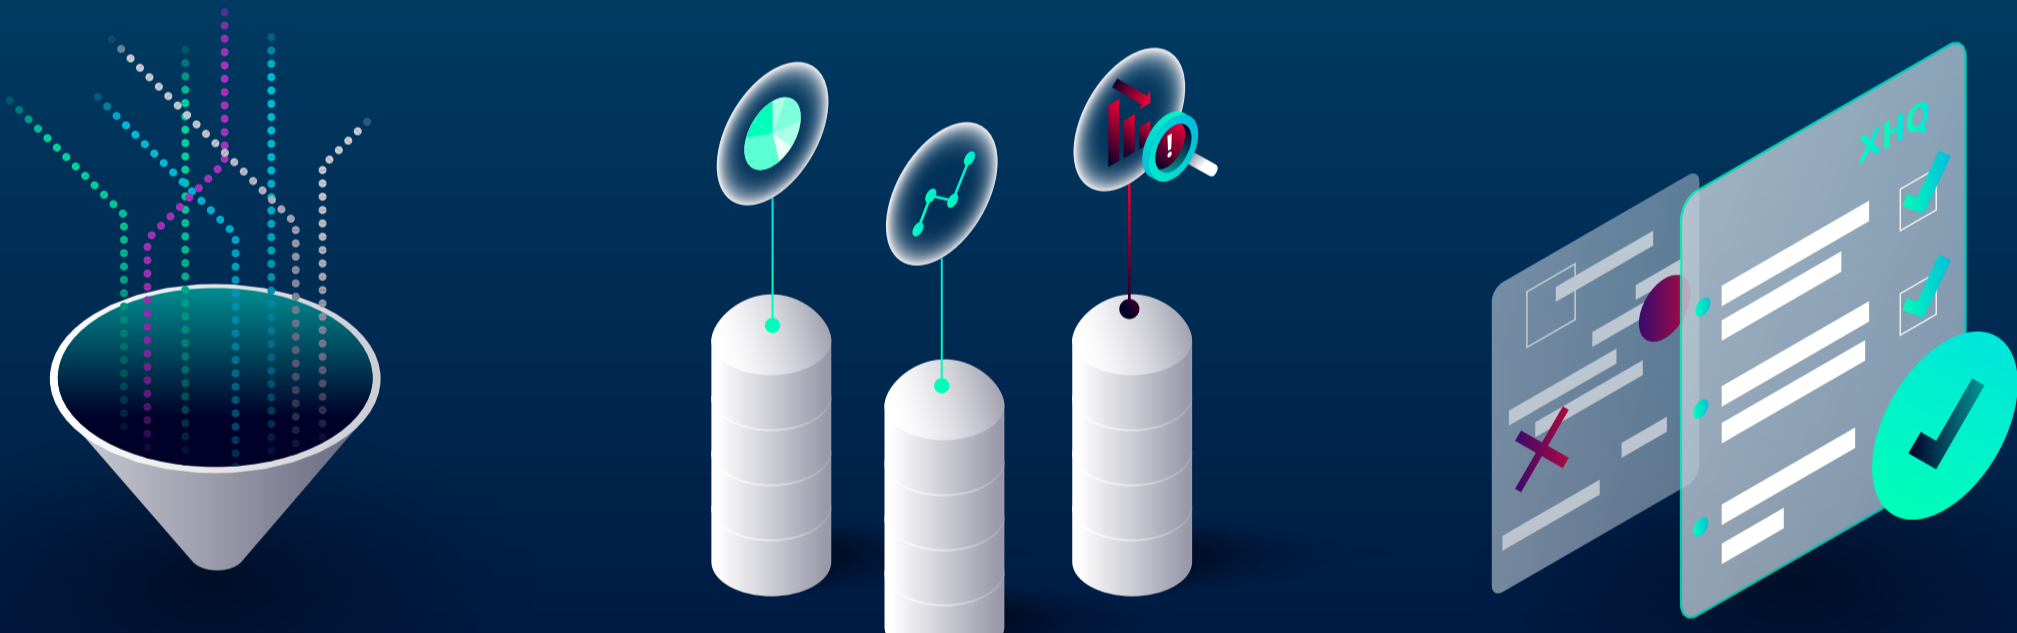

XHQ provides actionable data and insights to employees of any discipline, regardless of location or device used.

- Single source of truth
- Real-time monitoring
- Available on all devices
- Accessible anywhere
- Pre-built connectors for many sources
- On-premise and cloud
- Customizable dashboards for staff at any level

## Complete overview of your assets at your fingertips

A single portal that brings together all types of information about your assets – all updated in real time.
