## Background

Zvi Feuer is senior vice president of Digital Manufacturing Software Solutions for Siemens Digital Industries Software, a business unit of Siemens Digital Industries. Digital Manufacturing Software develops software products to deliver world-class solutions for manufacturing (part & assembly) planning, simulation, and validation and operations (MES, scheduling, quality, and automation).

In his current role, his responsibilities include leading global teams and initiatives to develop and service customers worldwide by providing Digital Manufacturing Software solutions that range from optimization of production and service facilities, design of assembly lines, development and validation of production systems, to the programming of CNC machines for managing production lines and plants.

Zvi has more than thirty-five years of experience in enterprise software business management, with a primary focus in the manufacturing industries domain.
