Xcelerator Academy Learning Maps
Your learning: At a Glance

SIEMENS

Collaboration

Connect people and processes across boundaries

Teamcenter® is the broadest and deepest PLM system available, providing a digital thread that connects people and processes across traditional functional silos.

Teamcenter Learning →

Bring your software lifecycle under control

Polarion ALM unifies the software development lifecycle with real-time management data, allowing teams to respond faster to new opportunities and demands.

Polarion Learning →

Applications

Low-code app development drives digitalization

The Mendix low-code application development platform helps developers rapidly build, deploy and operate enterprise-grade software applications.

Mendix Learning →

Coming soon!

Analytics

Connect your enterprise with the IoT

MindSphere® uses IoT solutions to optimize operations, create better products and drive new business models by connecting data from products, plants, and systems.

MindSphere Learning →

Operations

Digitalize manufacturing operations management

Opcenter enables the complete digitalization of manufacturing operations providing users end-to-end visibility into design, production and manufacturing.

Opcenter Learning →

Manufacturing

Synchronize engineering, manufacturing and service

Tecnomatix helps transform ideas into products and achieve synchronization between product and manufacturing engineering, production, and service operations.

Tecnomatix Learning →

Digitally transform part production

NX for Manufacturing drives efficient end-to-end part manufacturing operations and delivers high-precision parts through digitalization for increased productivity and profitability.

NX for Manufacturing →

Simulation

A complete digital twin simulation solution

Simcenter™ software combines system simulation, 3D CAE, and test to help you optimize designs and deliver innovations faster and with greater confidence.

Simcenter Learning →

Electronics

Smarter products, faster

Achieve smarter, more capable products with the help of an industry-leading suite of IC, PCB and electronics design, verification and manufacturing solutions.

Siemens EDA Learning →

A comprehensive E/E systems development solution

Capital offers capabilities for the design, manufacture, and service of electrical systems and is now expanded to encompass software architectures, network communications, and embedded software development.

Capital Learning →

Mechanical

The next generation of mechanical design, simulation, and manufacturing

Siemens NX delivers the next generation of mechanical design, simulation, and manufacturing solutions to help companies develop better products, faster.

NX Learning →

Enable creative design, fast

Solid Edge offers fast, flexible tools in an affordable and easy-to-use package, allowing companies of all sizes to digitalize product development.

Solid Edge Learning → Coming soon!

ACHIEVE CERTIFICATION

Siemens Xcelerator Academy Certified

Teamcenter Certified Associate 2022

Instructor-led training	On-demand training library	Xcelerator Academy Membership	Learning Journey	Standalone Certification Exam
**Virtual lab environment included in offer		Add-on vLab hours available for purchase	**Virtual lab environment included in offer	

SIEMENS

Complete Course List:
Teamcenter / Teamcenter X Associate

Teamcenter / Teamcenter X Associate

Getting Started with Teamcenter Active Workspace / Teamcenter X (1 day)

Identify starting tasks for a consumer	Identify starting tasks for a manager / checker	Identify starting tasks for an author / designer
Identify basic tasks for a consumer	Identify basic tasks for a manager / checker Approve and release data for a manager / checker Initiate a workflow for a manager / checker	Identify basic tasks for an author / designer Work with data and relations Import Excel and Word files Get started with BOMs Approve and release data for an author / designer Initiate a workflow for an author / designer Develop and release product designs

Teamcenter Active Workspace / Teamcenter X Essentials (1 day)

Work smarter in Active Workspace	Manage your product structure	Visualize your product model	Manage your release process
Identify additional basic abilities in Active Workspace Identify additional search techniques to find content	Open and view product structures Create and edit product structures Analyze product structures	View visualization data	Manage workflow task assignments Preconfigured workflows

Teamcenter Installation and Configuration (16.5 days)

Install using Deployment Center	Identify Teamcenter install fundamentals	Add-on to a Teamcenter install	Install Active Workspace
Identify & install Deployment Center Manage the Deployment Center Repository Manage Teamcenter environments with Deployment Center Deploy software with Deployment Center	Getting started with Teamcenter Installation Install Teamcenter databases Teamcenter preinstallation tasks Installing the corporate server Install and configure a J2EE 4-tier architecture Install and configure a .NET 4-Tier architecture	Install the Business Modeler IDE (BMIDE) Configure the File Management System (FMS) Install Dispatcher Perform a silent installation Install Teamcenter patches	Identify basic aspects of an Active Workspace installation Install microservices Install Active Workspace server extensions Install the Active Workspace client components Install the indexing components Install the visualization components

Identify Teamcenter data model (BMIDE)	Perform advanced Teamcenter data model (BMIDE) tasks	Perform Active Workspace client admin 1	Perform Active Workspace client admin 2
Identify Business Modeler IDE (BMIDE) fundamentals Extend the data model Create and manage business objects Manage business object properties	Administer lists of values (LOVs) Administer rule extensions (part 1) Administer rule extensions (part 2) Run BMIDE reports Deploy packages and updates	Identify Teamcenter administration tasks that apply to you Configure tiles in Active Workspace Manage groups, roles, and users in Active Workspace Configure table columns in Active Workspace	Manage style sheets with the XRT Editor Manage preferences in Active Workspace Add BMIDE constraints for Active Workspace

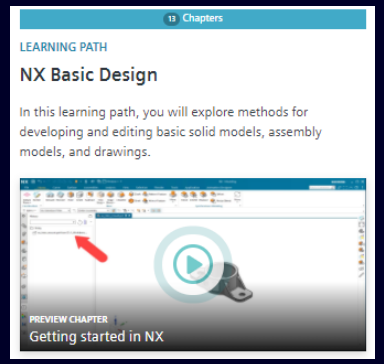
Designing Parts in NX + Intermediate NX Design & Assemblies

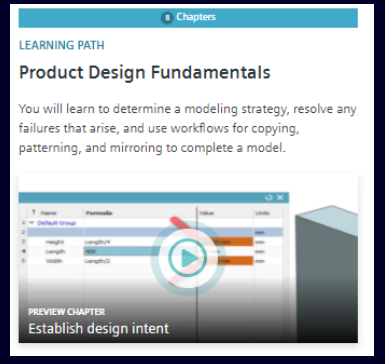
or

NX Essentials

→ Pass the exam → Siemens Xcelerator Academy Certified — NX Design Certified Associate 2022

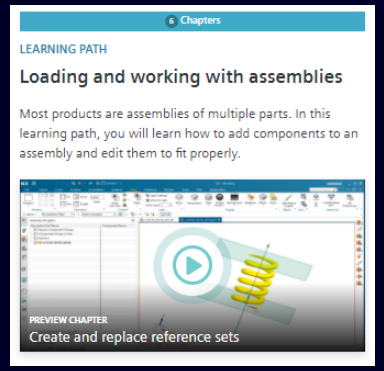


- NX user interface
- Create a basic part
- Organize and display part models
- Create cylindrical parts using sketches
- Add finishing details
- Simple changes and part interrogation
- Basic part edits using synchronous
- Analyze existing assemblies
- Bottom-up assembly
- Create a basic part drawing



- Establish design intent
- Analyze the design and make changes
- Create parts with constant wall thickness
- Sweep geometry
- Building parts with duplicated geometry
- Create symmetric models

- Create molded parts
- Build basic parts using surfaces
- Build robust models
- Data translators
- Edit non-parametric models



- Manage assemblies
- Configure an assembly
- Create reusable components
- View component interaction using sequencing

- Top-down modeling
- Link geometry between related parts
- Create expression links between parts
- Revise assemblies

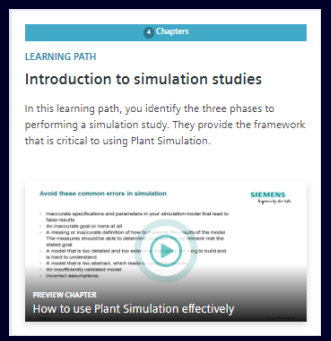
Plant Simulation Basics + Set up 3D objects

or

Tecnomatix Plant Simulation

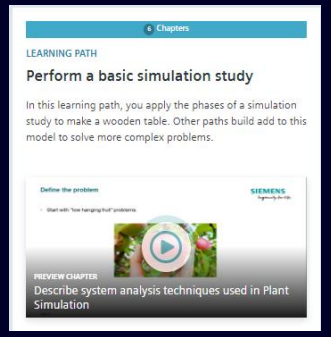
→ Pass the exam → Siemens Xcelerator Academy Certified — Plant Simulation Associate 2022



Overview of Plant Simulation

Get started with Plant Simulation

Explore the Plant Simulation graphical user interface



Define a target, analyze a simple system, and acquire data

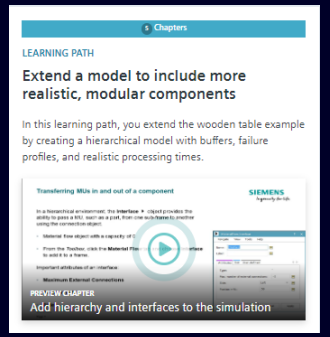
Create a simple model

Validate the throughput of a simple model

Prepare to create a new model from the previous model

Create a more detailed model to produce a better result

Implement basic objects to analyze results



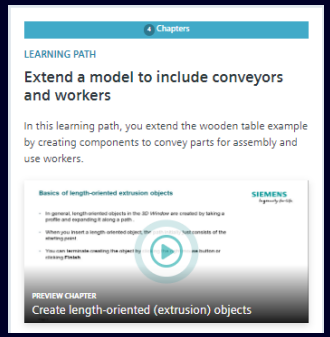
Create a hierarchical model

Identify inherited objects and attributes

Navigate and change 3D viewer visualization

Simulate machine processing time and failures with distributions

Material flow objects with a capacity greater than one

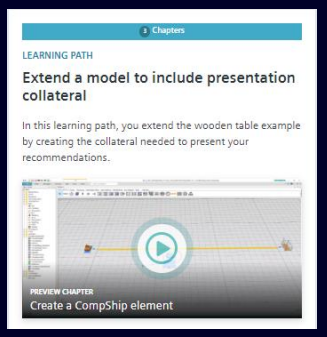


Model length-oriented objects

Setup time, assembly, and dismantle objects

Create user-defined attributes and data tables

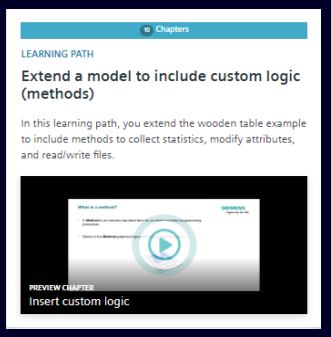
Use basic workers and work shifts



Create experiments and custom reports

Gather time, cost, and power consumption statistics

Add textured plates, point clouds, and backgrounds



Insert custom logic

Use the Method Debugger and anonymous identifiers

Run a method during a simulation

Set attribute values with methods

Access data in tables, lists, and global variables

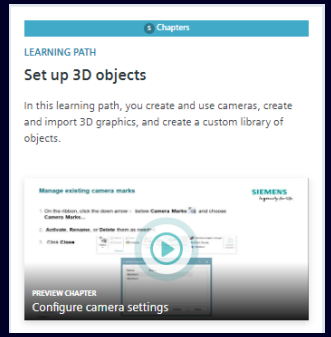
Use distribution functions, use operators, and convert data

Create conditional methods and access the contents of an object

Model transport systems and setup time

Collect statistics with methods

Save and load data into a Plant Simulation table



Setup and use cameras

Import and create a library of 3D objects

Create MU animation and animatable objects

Customize 3D objects with methods

Use advanced worker techniques

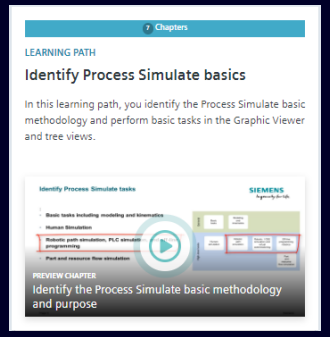
Process Simulate basics, modeling, and kinematics + Process Simulate basics and robotic path development + Develop Process Simulate object flow simulations + Develop Process Simulate human simulations → Pass the exam → Siemens Xcelerator Academy Certified – Process Simulate Standalone Associate 2022

or

Tecnomatix Process Simulate Standalone → Pass the exam → Siemens Xcelerator Academy Certified – Process Simulate Standalone Associate 2022



Identify basic concepts for PS on eMS Standalone

Identify Process Simulate basics

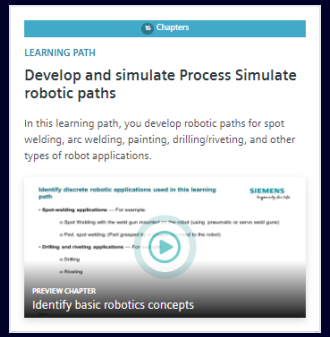
Identify basic tools in Process Simulate environment (part 1)

Identify basic tools in Process Simulate environment (part 2)

Identify the placement commands

Use kinematics to create operations

Detect collisions



Define part-in-tool robot spot welding paths

Adjust welds in spot welding paths

Define part-on-robot spot welding paths

Search for spot weld guns and use servo guns

Define robotic drilling and riveting paths

Define robotic material handling paths

Define robotic arc welding continuous feature paths

Define robotic paint continuous feature paths

Define other robotic continuous feature paths

Test robot reach and set basic robotic path attributes

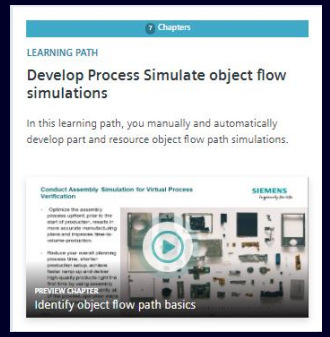
Add via locations to avoid collisions

Identify other path modification and creation tools

Identify location attributes for multiple robot interlocking

Create swept volumes, interference zones, and events

Examine other robotic path modification tools and techniques



Create object flow simulative operations

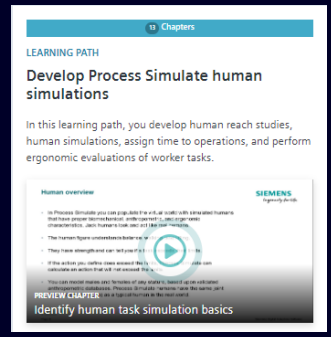
Create locations in object flow simulative operations

Modify locations in object flow simulative operations

Create sequences of object flow simulative operations

Use presentation mode, event creation, and movie manager

Simulate hand tools and virtual reality



Identify the human model and human simulation options

Create basic human operations

Create human operations using Task Simulation Builder (TSB)

Create human operations using other automatic posture tools (part 1)

Create human operations using other automatic posture tools (part 2)

Create and view ergonomic reports (part 1)

Create and view ergonomic reports (part 2)

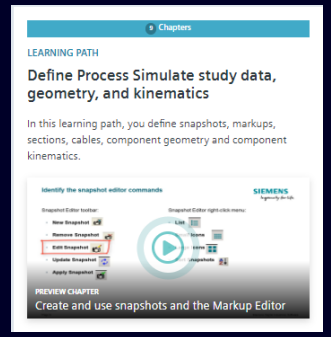
Assign a duration to human operations

Identify other Process Simulate human tools

Use traditional techniques to create human simulations (part 1)

Use traditional techniques to create human simulations (part 2)

Examine features related to body and hand motion capture



Create snapshots, markups, notes, and pictures

Create sections and define cables

Import component geometry

Model geometry in Process Simulate

Define basic kinematics in Process Simulate

Define basic kinematic cranks and robotic tools

Define basic robot kinematics

Define advanced kinematics, rails, gantries, and positioners

Define advanced kinematic functions, compound equipment, and motion parameter files

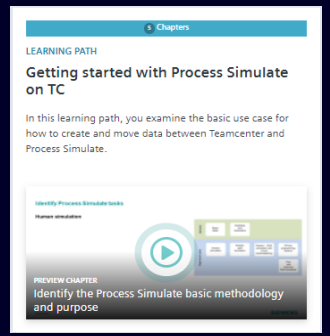
or Getting started with Process Simulate on Teamcenter + Process Simulate basics, modeling, and kinematics + Process Simulate basics and robotic path development + Develop Process Simulate object flow simulations + Develop Process Simulate human simulations → Pass the exam → Siemens Xcelerator Academy Certified

Process Simulate for Teamcenter Associate 2022

Tecnomatix Process Simulate on Teamcenter



Identify basics for Process Simulate on Teamcenter users

Identify steps in Teamcenter Manufacturing Process Planner required for Process Simulate on Teamcenter

Identify Process Simulate basics (PS on TC)

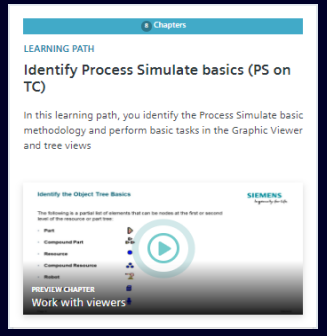
Identify the connection between Process Simulate on Teamcenter and Manufacturing Process Planner

Use the basic Teamcenter environment

Introduction to MPP and MBM

Create and use collaboration context objects

Manage and validate studies



Identify basic concepts for PS on eMS Standalone

Identify Process Simulate basics

Identify basic tools in Process Simulate environment (part 1)

Identify basic tools in Process Simulate environment (part 2)

Identify the placement commands

Use kinematics to create operations

Detect collisions

Define part-in-tool robot spot welding paths

Adjust welds in spot welding paths

Define part-on-robot spot welding paths

Search for spot weld guns and use servo guns

Define robotic drilling and riveting paths

Define robotic material handling paths

Define robotic arc welding continuous feature paths

Define robotic paint continuous feature paths

Define other robotic continuous feature paths

Test robot reach and set basic robotic path attributes

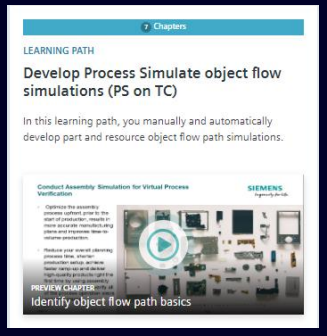
Add via locations to avoid collisions

Identify other path modification and creation tools

Identify location attributes for multiple robot interlocking

Create swept volumes, interference zones, and events

Examine other robotic path modification tools and techniques



Create object flow simulative operations

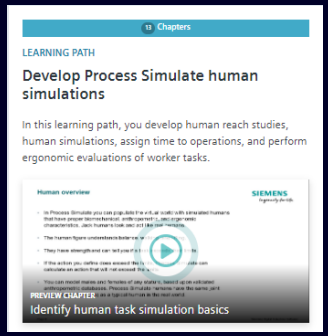
Create locations in object flow simulative operations

Modify locations in object flow simulative operations

Create sequences of object flow simulative operations

Use presentation mode, event creation, and movie manager

Simulate hand tools and virtual reality



Identify the human model and human simulation options

Create basic human operations

Create human operations using Task Simulation Builder (TSB)

Create human operations using other automatic posture tools (part 1)

Create human operations using other automatic posture tools (part 2)

Create and view ergonomic reports (part 1)

Create and view ergonomic reports (part 2)

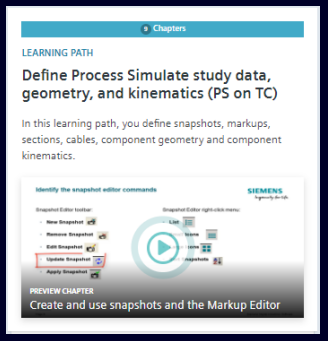
Assign a duration to human operations

Identify other Process Simulate human tools

Use traditional techniques to create human simulations (part 1)

Use traditional techniques to create human simulations (part 2)

Examine features related to body and hand motion capture



Create snapshots, markups, notes, and pictures

Create sections and define cables

Import component geometry

Model geometry in Process Simulate

Define basic kinematics in Process Simulate

Define basic kinematic cranks and robotic tools

Define basic robot kinematics

Define advanced kinematics, rails, gantries, and positioners

Define advanced kinematic functions, compound equipment, and motion parameter files

Select a role below

LEARN THE BASICS

Administrator	Interrogate an NX part that has been manufactured and machine a simple prismatic part.

LEARN ABOUT MANUFACTURING PARTS

Manufacturing Engineer & Tooling Designer	Manufacture prismatic, multi-axis, lathe parts, use NX for turbomachinery, Post Process NX CAM parts.

LEARN ABOUT LINE PLANNER & ROBOTICS

Line Planner & Machine/Robotics Programmer	Manufacture parts, set up a manufacturing line based on NX Line Planner, and use NX for Robotics.

GET CERTIFIED

NX CAM Manufacturing Engineer Associate Certification	Choose your learning and take your exam to complete the NX CAM Manufacturing Engineer Associate certification.

SIEMENS

NX CAM → At a Glance

LEARN THE BASICS

Administrator
- NX Basic Design
- Managing NC Programming Data
- Machining a Prismatic Part

Manufacturing Engineer
- Fixed and Multi axis
- Turbomachinery and other Multi-axis options

NX CAM Manufacturing Engineer Associate Certification
Siemens Xcelerator Academy Certified
NX CAM Manufacturing Engineer Associate 2022

Click for detailed certification course list

LEARN ABOUT MANUFACTURING PARTS

Manufacturing Engineer & Tooling Designer
- Turning Manufacturing
- Turning – Other Options
- Post Configurator

LEARN ABOUT LINE PLANNER & ROBOTICS

Line Planner & Machine/Robotics Programmer
- Line Designer - Native
- Line Designer - Teamcenter
- Other Manufacturing Options

Instructor-led training	On-demand training library	Xcelerator Academy Membership	Learning Journey	Standalone Certification Exam	Optional
**Virtual lab environment included in offer		Add-on vLab hours available for purchase	**Virtual lab environment included in offer		

SIEMENS

Complete Course List: NX CAM Manufacturing Engineer Associate Certification

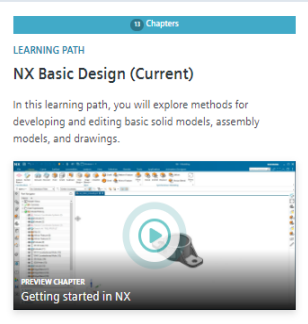
Instructor-led training	On-demand training library	Xcelerator Academy Membership
**Virtual lab environment included in offer		Add-on vLab hours available for purchase

Manufacturing Basics + Fixed and Multi-axis Machining

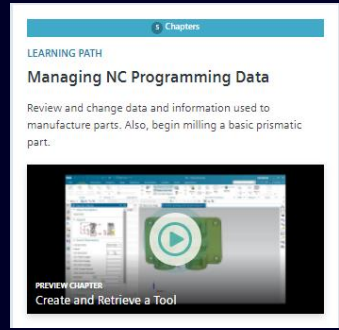
or

NX CAM Manufacturing Engineer

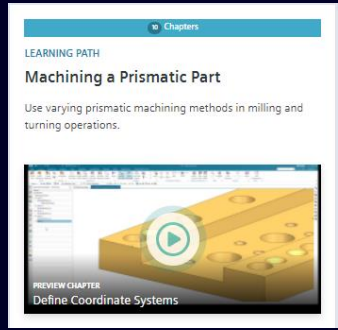
→ Pass the exam → Siemens Xcelerator Academy Certified — NX CAM Manufacturing Engineer Associate 2022



- NX User Interface
- Create a basic part
- Organize and display part models
- Create cylindrical parts using sketches
- Add Finishing Details
- Simple changes and part interrogation
- Basic part edits using synchronous
- Analyze existing assemblies
- Bottom-up assembly building
- Create a basic part drawing
- Using legacy sketch with NX 2007

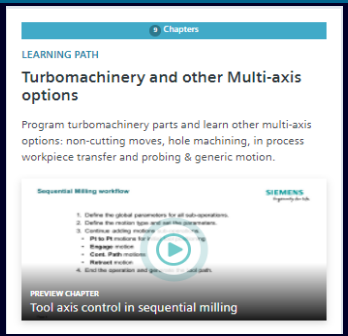


- Study Manufacturing process and create manufacturing setup
- Create and structure an NC program
- Examine a manufacturing part
- Create and structure NC documents



- Cavity Milling
- Use Coordinate Systems in Manufacturing
- Visualize Tool Paths
- Non Cutting Moves
- Planar Milling
- Hole Making
- Fixed Axis Contouring
- Additional Prismatic Operation Types
- Using Additional Machining Functionality

- Plunge milling and z-level milling
- Fixed-axis contouring
- 4 and 5-axis machining and 5-axis Z-level
- Variable Axis Contour Milling
- Profiling walls with a variable axis



- Turbomachinery Milling
- Sequential Milling
- Associative Machining Geometry
- Hole Machining
- In process Workpiece transfer
- Probing and Generic Motion
- Projects

Additive Manufacturing

Use our interactive learning maps as a guide to navigate through your content based upon your role then click on the icons throughout to learn more about your delivery options.

Select a role below

LEARN THE ESSENTIALS

Additive Manufacturing Designer

Designed to provide additive manufacturers the foundation they need to model components intended to be additively manufactured

LEARN PLANAR ESSENTIALS

Planar (powder bed) Manufacturing Engineer

Learn how to organize build trays, provide supporting structures, develop and simulate programs for powder bed additive machines and other planar additive processes.

LEARN DEPOSITON OPERATIONS

Multi-axis Deposition Manufacturing Engineer

Provide manufacturers the foundation they need to program deposition operations in NX CAM to support additive manufacturing on various deposition machines

GET CERTIFIED

Additive Manufacturing Designer Associate Certification

Choose your learning and take your exam to complete the Additive Manufacturing Designer Associate **certification**.

SIEMENS

Additive Manufacturing Designer→ At a Glance

LEARN THE ESSENTIALS

Additive Manufacturing Designer

- Introduction to Additive Manufacturing
- Component Design for Additive Manufacturing
- Polygon Modeling and Reverse Engineering

Use Additive Manufacturing Designer!

Additive Mfg. Designer Associate Certification

Click for detailed certification course list

LEARN PLANAR ESSENTIALS

Planar (powder bed) Mfg. Engineer

- NX Additive Manufacturing - Planar Additive
- Maximizing Your Build Success with AM Build Optimizer
- Additive Manufacturing Process Simulation

Learn how to simulate programs for powder bed additive machines

LEARN DEPOSITON OPERATIONS

Multi-axis Deposition Mfg. Engineer

- Managing NC Programming Data
- Multi-axis Additive Manufacturing

Support additive manufacturing on various deposition machines

Instructor-led training	On-demand training library	Xcelerator Academy Membership	Learning Journey	Standalone Certification Exam	Optional

SIEMENS

Instructor-led training | On-demand training library | Xcelerator Academy Membership

**Virtual lab environment included in offer | Add-on vLab hours available for purchase

Course List: Additive Manufacturing Designer Associate Certification

Additive Manufacturing

Introduction to Additive Manufacturing Processes

Additive Manufacturing in NX

Additive Manufacturing and the Product Development Lifecycle

Additive Manufacturing Tradeoffs and Strategy

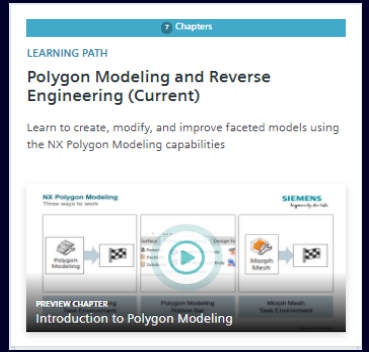
Introduction to Component Design for Additive Manufacture

Useful Modeling Techniques for Additive Manufacturing

Designing with Lattices

Designing with Scanned Geometry

Generative Design and Topology Optimization



Introduction to Polygon Modeling – 1953

Using the Polygon Modeling Task Environment – 1953

Using the Polygon Modeling Ribbon Bar – 1953

Using the Polygon Modeling Morph Mesh Task Environment – 1953

Reverse Engineering - 1953

Pass the exam

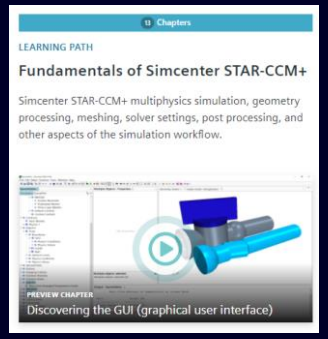
Complete Course List: Simcenter STAR-CCM+ Associate CFD Analyst Certification

Fundamentals in Simcenter STAR-CCM+ + Heat transfer + Data analysis in Simcenter STAR-CCM+ + Efficient workflows in Simcenter STAR-CCM+

or

CFD Analysis: Fundamentals of Simcenter STAR-CCM+

→ Pass the exam → Siemens Xcelerator Academy Certified — Simcenter Star-CCM+Certified Associate 2022



Stepping into the workflow

Workflow details

Preparing imported geometry

Considering the mesh setup

Refining the mesh

Setting up the physics

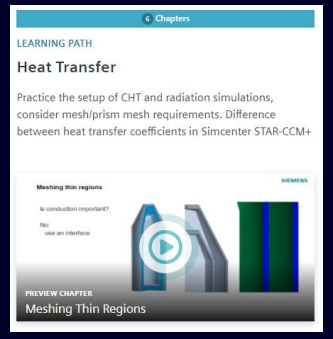
Analyzing data

Advanced analysis

Moving with reference frames

Effective simulations

Planning the simulation workflow effectively



Heat Transfer Introduction

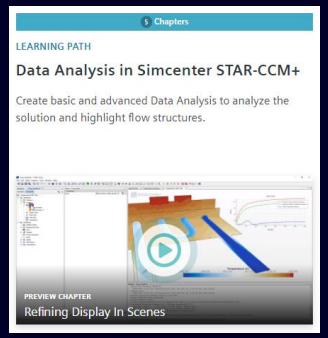
Workflow Heat Transfer

Solar Radiation

Advanced Heat Transfer

Heat Transfer Coefficients

Thermal Radiation



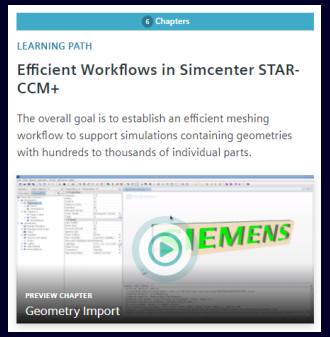
Fundamental plotting

Color and light effects

Volume rendering

Accessing solution data

Playing screens



Preparing the Geometry
Meshing Setup
Physics

Model and Value Definitions

Simulation Setup, Data Analysis and Reporting

Converting a Simulation File into a Template File

Using Simulation Operations

LEARN CAPITAL LOGIC DESIGNER ESSENTIALS

Schematic & Wiring Designers	New users are given the basic skills required to create a systems design and a wiring diagram, followed with advanced functionality to create a more complex design.

LEARN ADVANCED CONNECTIVIY FUNCTIONALITY

Schematic or Wiring Designer, or Administrator	Extended learning for all designers, engineers & others, working with schematics and wiring diagrams, using Capital Logic and supporting applications..

LEARN ELECTRICAL OPTIMIZATION & VERIFICATION

Schematic & Wiring Designers	Learn how to use simulation and analysis tools to validate electrical design connectivity along with electrical load analysis.

LEARN TOPOLOGY DESIGN

Topology Designer	Engineers working with Capital Topology learn how to create a topological view and associate wiring designs to it, for wire routing scenarios using rules..

GET CERTIFIED

Capital Logic Designer Associate Certification	Choose your learning and take your exam to complete the Capital Logic Design Associate **certification**.

SIEMENS

Capital Logic Designer → At a Glance
