

Collaboration

Connect people and processes across boundaries

Teamcenter[®] is the broadest and deepest PLM system available, providing a digital thread that connects people and processes across traditional functional silos.

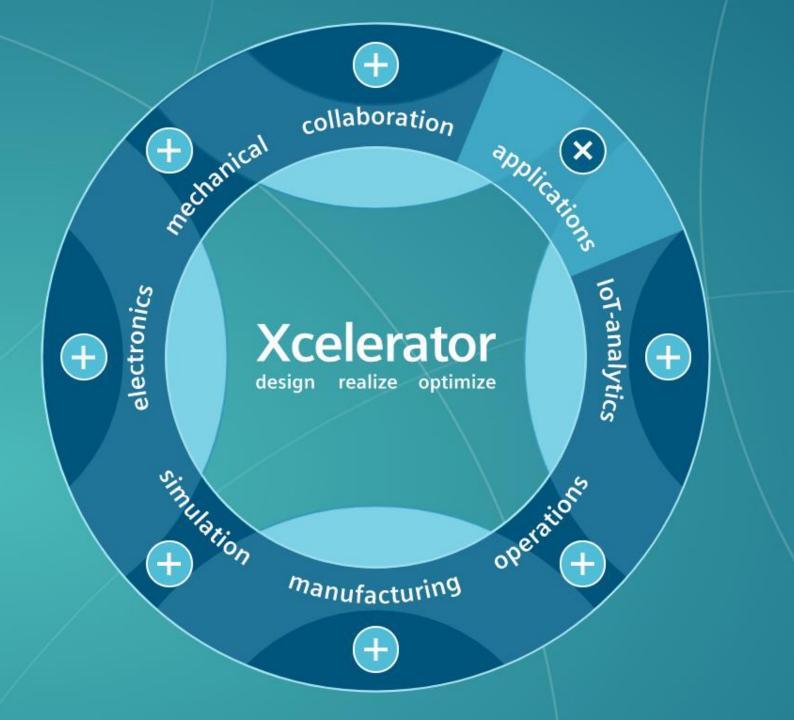

Teamcenter Learning →

Bring your software lifecycle under control

Polarion ALM unifies the software development lifecycle with real-time management data, allowing teams to respond faster to new opportunities and demands.

Polarion Learning →

Applications

Low-code app development drives digitalization

The Mendix low-code application development platform helps developers rapidly build, deploy and operate enterprise-grade software applications.

Mendix Learning →

Coming soon

Analytics

Connect your enterprise with the IoT

MindSphere[®] uses IoT solutions to optimize operations, create better products and drive new business models by connecting data from products, plants, and systems.

MindSphere Learning →

Operations

Digitalize manufacturing operations management

Opcenter enables the complete digitalization of manufacturing operations providing users end-toend visibility into design, production and manufacturing.

<u>Opcenter Learning</u> →

Manufacturing

Synchronize engineering, manufacturing and service

Tecnomatix helps transform ideas into products and achieve synchronization between product and manufacturing engineering, production, and service operations.

Tecnomatix Learning →

Digitally transform part production

NX for Manufacturing drives efficient end-to-end part manufacturing operations and delivers highprecision parts through digitalization for increased productivity and profitability.

NX for Manufacturing →

Simulation

A complete digital twin simulation solution

Simcenter[™] software combines system simulation, 3D CAE, and test to help you optimize designs and deliver innovations faster and with greater confidence.

Simcenter Learning →

Electronics

Smarter products, faster

Achieve smarter, more capable products with the help of an industry-leading suite of IC, PCB and electronics design, verification and manufacturing solutions.

Siemens EDA Learning →

A comprehensive E/E systems development solution

Capital offers capabilities for the design, manufacture, and service of electrical systems and is now expanded to encompass software architectures, network communications, and embedded software development.

Capital Learning →

Mechanical

The next generation of mechanical design, simulation, and manufacturing

Siemens NX delivers the next generation of mechanical design, simulation, and manufacturing solutions to help companies develop better products, faster.

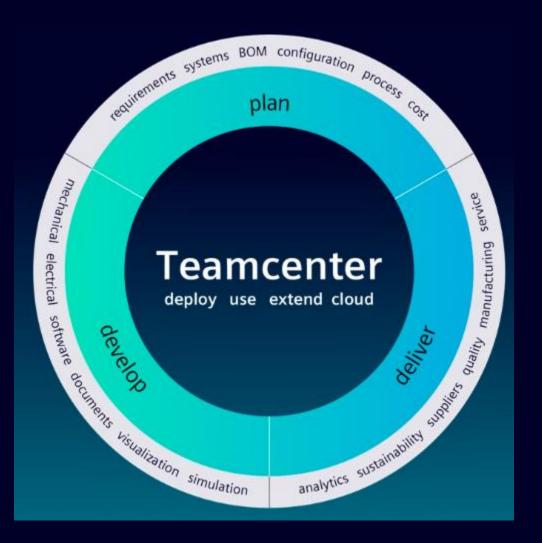

NX Learning →

Enable creative design, fast

Solid Edge offers fast, flexible tools in an affordable and easy-to-use package, allowing companies of all sizes to digitalize product development.

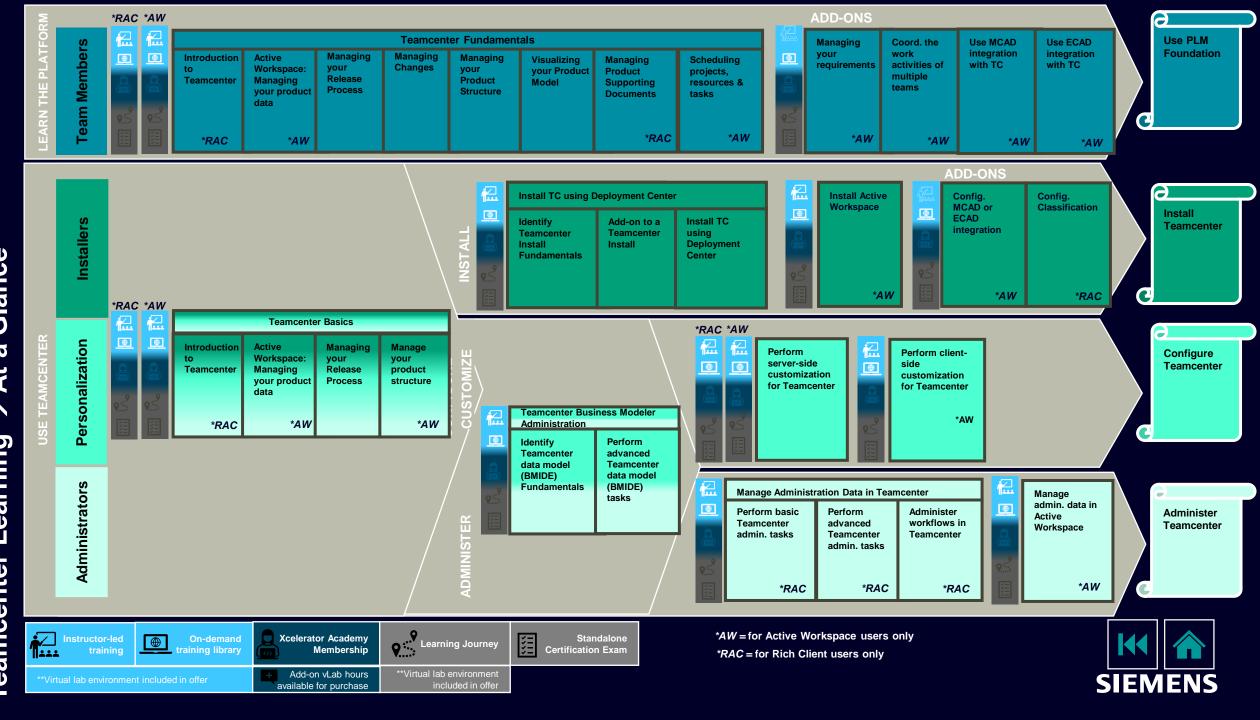

<u>Solid Edge Learning</u> \rightarrow Coming soon!
