

### XC10 Data

#### **EU Data sharing information**

**On 11 January 2024, the EU Data Act, a central component of the European data strategy, entered into force.**

**The following information gives you an overview of the data which our Extinguishing control panels family XC10 generate and how they are made available to you.**

## TYPE, FORMAT, AND ESTIMATED AMOUNT OF PRODUCT DATA THAT CAN BE GENERATED

Data type	Data format	Estimated size
Event memory (Incidents)	Exportable as .CSV file	Less than 1MB

### Continuous and real-time data generation

The XC10-systems can generate data continuously and in real time throughout operation. The CPU works with defined cycle times in which process data is recorded and processed. Updates to stored data depend on the use case.

- Events (Incidents) can occur spontaneously during normal system operation.

## DATA STORAGE AND STORAGE PERIOD

### Local data storage

The XC10-systems stores data in integrated memory as well as the RAM and flash memory of the CPU.

Local Data Storage	Capacities	Storage Duration
Events (Incidents): ring buffer	Default setting: keep latest 1.000 Events per panel (rules related to Event categories configurable)	Persistent (permanent)

### Remote data storage

Not applicable

## ACCESS / RETRIEVAL, DELETION OF DATA, TERMS OF USE AND QUALITY OF SERVICE

Type of data	Access/retrieval via	Terms of Use	Quality of Service
Event memory (Incidents)	XC10 SW Tool	MCL-USB (FDUZ221) adapter connected between the PC (USB port) and connector X21 of XCM1002 mainboard (follow installation instructions of the drivers delivered with the product)	No specific definition

### Deletion of data

To delete all data, follow the description for factory reset in the technical manual.
