## Background

Raymond Kok is the CEO of Mendix, an industry-leading low-code application development platform. By bridging the gaps in communication and collaboration between business and IT, Mendix helps enterprises turn ideas into outcomes by delivering sophisticated applications faster than ever before.

Ray joined Siemens Software in 2001 through an internship with the NX R&D organization and from there has progressed his career through the Global Sales & Services, NX and Technology Office organizations. Most recently, Ray was a Senior Vice President leading the Cloud application Solutions business segment.

In previous roles, Ray successfully initiated the Software-as-a-Service (SaaS) transformation of the Siemens PLM software portfolio, transformed the Siemens Industrial IoT platform business towards an integrated solution offering with the Digital Manufacturing software portfolio, and established a unified setup for the core cloud, edge and e-commerce technology for Siemens Xcelerator culminating in the creation of the Foundational Services organization for Siemens Digital Industries.

Raymond received his MSc and BSc in Mechanical Engineering at the Technical University of Eindhoven, the Netherlands. After 15 years working from various office locations in The Netherlands and US, Ray is now located at our Costa Mesa, California R&D center.

## About Siemens Digital Industries Software

Siemens Digital Industries Software is driving transformation to enable a digital enterprise where engineering, manufacturing and electronics design meet tomorrow. Xcelerator, the comprehensive and integrated portfolio of software and services from Siemens Digital Industries Software, helps companies of all sizes create and leverage a comprehensive digital twin that provides organizations with new insights, opportunities and levels of automation to drive innovation.
