

# Software as a Service (SaaS) Supplemental Terms

Siemens Digital Industries Software

These Software as a Service Supplemental Terms (“**SaaS Terms**”) amend the Universal Customer Agreement (“**UCA**”) between Customer and Siemens solely with regard to Offerings which have been assigned the alphanumeric code ‘SAAS’ on the Order. These SaaS Terms together with the UCA and other applicable Supplemental Terms form the agreement between the parties (“**Agreement**”). Offerings under these SaaS Terms primarily consist of Cloud Services.

## 1. DEFINITIONS

Capitalized terms used herein have the meaning as defined elsewhere in the Agreement. The following additional definitions apply to these SaaS Terms:

“**Affiliate**” means any entity that controls, is controlled by, or is under common control with Customer; in this context, “control” means ownership, directly or indirectly, of a majority of the outstanding equity of an entity.

“**Authorized Agent**” means an individual who requires access to the Offering in support of Customer’s or Customer Affiliates’ internal business as consultant, agent, or contractor, or who is otherwise expressly permitted in these SaaS Terms to access and use the Offering.

“**Authorized User**” or “**Named User**” means Customer’s and its Affiliates’ employee or Authorized Agent. Each Authorized User must use a unique user identification to access and use the Offering, unless a generic logon is expressly permitted in these SaaS Terms or applicable Documentation. User identifications may not be shared with other individuals.

“**Credit**” means a pre-paid unit which any Authorized User can convert into a right to access and use the Offering or certain additional functionalities, applications and/or modules of the related Offering designated on the Order. Credits can be consumed during the Subscription Term of the applicable Offering and are not re-usable. The specific functionalities, applications and modules that can be accessed and the quantity of Credits required, and any other details are described in the Documentation.

“**High Risk System**” means a device or system that requires enhanced safety functionalities such as fail-safe or fault-tolerant features to maintain a safe state where it is reasonably foreseeable that failure of the device or system could lead directly to death, personal injury, or cata-strophic property damage. High Risk Systems may be required in critical infrastructure, direct health support devices, aircraft, train, boat, or vehicle navigation or communication systems, air traffic control, weapons systems, nuclear facilities, power plants, medical systems and facilities, and transportation facilities.

“**Per Product**” license means that the use of the Cloud Service is restricted to the number of Siemens Offerings or third-party products to which the Cloud Service is interfaced on a one-to-one User basis.

“**Territory**” means worldwide (subject to Customer’s obligations in the Agreement regarding compliance with export controls), unless a geographic area is specified on the Order.

“**Token**” means a pre-paid unit which any Authorized User can temporarily convert into a right to access and use the Offering or certain additional functionalities, applications and/or modules of the related Offering designated on the Order. The specific functionalities, applications and modules that can be accessed and the quantity of Tokens required, and any other details are described in the Documentation. When Tokens are applied by one User, those Tokens will not be available until this Authorized User ceases to use the functionalities, applications or modules which have been accessed.

“**Value Based License**” means a Token for particular Offering designated on the Order Form.

## 2. GENERAL

2.1. **Authorized Access and Use.** Each Offering may be accessed and used only by Authorized Users in the Territory for the Subscription Term, solely in accordance with the Entitlements and the Agreement. Customer may re-assign the entitlement to access and use the Offering from one Authorized User to another Authorized User within the same entitlement category once per calendar month. Indirect use of an Offering via hardware or software used by Customer does not reduce the number of Authorized User entitlements that Customer needs to acquire.

2.2. **Changes to Supplemental Terms. Enhancement of Offerings.** Siemens may only update these SaaS Terms during a Subscription Term, provided any such update does not (i) have a material adverse effect on Customer’s rights (e.g. with respect to Entitlements or service levels) or (ii) result in a material degradation of the security measures maintained by Siemens with regard to the Cloud Services or Customer Content. The foregoing shall not limit Siemens’ ability to make changes to these SaaS Terms (i) to comply with applicable law, (ii) address a material security risk, (iii) to reflect changes made to the Offering in accordance with any change provision in the Agreement, or (iv) that are applicable to new features, supplements, enhancements, capabilities or additional Cloud Services or Software provided as part of Customer’s subscription to the Offering at no extra charge. When Customer uses any such new feature, supplement, enhancement, capability or Cloud Services or Software, the then-current SaaS Terms available at <https://www.siemens.com/sw-terms/supplements> shall apply to such use. In all other cases, if an update of the Supplemental Terms during a Subscription Term applies to Customer, Siemens will use commercially reasonable efforts to notify Customer at least 90 days prior to such change or as agreed elsewhere in the Agreement.

2.3. **Test Updates.** Certain Offerings provide updates which will first be made available to Customer in a test instance for Customer’s review prior to deploying such update in production (“Test Update”). Siemens will give Customer notice when a Test Update is first available and the date when the production environment of the Offering will be updated. Customer’s entitlement to use any Test Update in a test instance is limited

as provided in the Agreement with the expectation that Customer will provide feedback to mitigate any concerns when the production environment is subsequently updated. Updates to the production environment for Offering will occur on a fixed date for all Customers.

- 2.4. **High Risk Use.** Customer acknowledges and agrees that (i) Cloud Services are not designed to be used for the operation of or within a High Risk System if the functioning of the High Risk System is dependent on the proper functioning of the Cloud Services and (ii) the outcome from any processing of data through the use of Cloud Services is beyond Siemens' control. Customer will indemnify Siemens, its affiliates, its sub-contractors, and their representatives, against any third party claims, damages, fines and cost (including attorney's fees and expenses) relating in any way to any use of a Cloud Service for the operation of or within a High Risk System.

### 3. SPECIFIC TERMS

The following additional terms apply solely to those Offerings that pertain to the respective product families listed below.

- 3.1. **Additive Manufacturing Network (AMN).** In addition to the right granted to Customer to access and use the Offering for its internal business purposes, Authorized Users shall also be entitled to access and use the AMN Offering to pursue Customer Transactions via the AMN Offering. Authorized Users shall include employees of Customer's customer located in the Territory whom Customer entitles to pursue Customer Transactions via Customer's subscription to the AMN Offering. "Customer Transaction" means any marketing, offer, sale or purchase of products or services by Customer to or from (i) an Authorized User or (ii) a third party that has its own current subscription to the AMN Offering, as facilitated by the use of the AMN Offering.

Any contractual relationship regarding Customer Transactions is solely between Customer and such third party and may be governed by separate terms made available with or as part of the respective Customer Content or Third Party Content. Siemens will have no responsibility for Third Party Content or Customer's use of such Third Party Content. Customer is an independent supplier or buyer and bears all economic opportunities and risks related to Customer Transactions. Customer shall ensure that Customer, and not Siemens, is identified as the contracting party to any Customer Transaction. Customer shall be solely responsible for all billing and collection or delivery in relation to Customer Transactions. Customer will indemnify Siemens, its affiliates, its subcontractors, and their representatives, against any third party claims, damages, fines and cost (including attorney's fees and expenses) relating in any way to (i) any Customer Transaction, including any refund, cancellation or return, and (ii) Customer's tax obligations or other applicable charges in relation to any Customer Transaction, or the collection, payment, or failure to collect or pay any taxes or other applicable charges in relation to any Customer Transaction, or Customer's failure to meet tax registration obligations or duties.

- 3.2. **PlantSight and Asset Performance Suite (APS).** Certain packaged Offerings of PlantSight or APS are limited by Entitlements stated in the Order, which shall be defined as follows:

- "Concurrent Users" means Authorized Users simultaneously using the PlantSight or APS Offering.
- "Industrial Plant" means an industrial facility at the same location and postal address which is owned, planned, operated or managed in whole or in part by Customer for a specific industrial business purpose. An Industrial Plant may consist of several buildings.
- "Tag" means a piece of data identifying a physical object in an Industrial Plant that Customer determines to be relevant for the operation of the Industrial Plant. Tags can include measurement points, set points and control points of a plant (for example a pump, valve, instrument, pipeline, but usually not an elbow, gasket, bolt or nut).

Certain features for operations intelligence use cases require a Subscription for XHQ and a respective managed service activity which need to be purchased separately.

- 3.3. **PCBflow.** PCBflow Offerings are made available on a per Unit basis only. "Unit" is a package including a maximum amount of DFM Reports per month as set out in the Order. "DFM Report" means an analysis which Authorized Users have generated, reviewed and/or downloaded with the PCBflow Offering during the respective month. This analysis reflects and documents any differences between the manufacturer classification set provided by a manufacturer user and the designer's file DFM provided by a designer user to the PCBflow Offering.

### 4. DATA CENTER LOCATIONS

Per default, Customer Content at rest will be stored within certain major geographic areas (each an "Area") as identified at <https://www.siemens.com/sw/trustcenter>. If Siemens offers Customer choices and Customer selects a specific Area for the provisioning of the Offering, Siemens will store Customer Content at rest within the selected Area. Siemens does not control or limit the regions from which Customer may access or move Customer Content.

### 5. SUPPORT AND SERVICE LEVELS

Siemens' technical support for the Offering and the applicable service levels are governed by the Cloud Support and Service Level Framework available at <https://www.siemens.com/sw-terms/sla>, which is incorporated herein by reference with the following portfolio specific deviations:

#### 5.1. **Digital Logistics AX4 and Supply Chain Suite.**

##### **Regular Maintenance Windows for AX4 and Supply Chain Suite**

For AX4 and Supply Chain Suite, Siemens will notify Customer at least 3 days before any Regular Maintenance Windows, which will usually occur no more than once per month and only on Saturdays. For these products, Regular Maintenance Windows will cause Cloud Services to be unavailable for no more than 4 hours (typically between 8 PM and 11:59 PM CET or between 8 PM and 11:59 PM in the time zone where the server is located).

5.2. **PlantSight, APS and SIMATIC AX.**

5.2.1 **No Telephone Support.**

Siemens does not offer telephone support for SIMATIC AX.

5.2.2 **Customer Response Level.**

The Targeted Response Times for PlantSight and APS are the following:

<b>Priority classes</b>	<b>Standard Support Targeted Response Time during Standard Support Hours</b>
<b>Critical</b>	2 hours
<b>High</b>	8 hours
<b>Medium/General</b>	48 hours
<b>Low</b>	48 hours

5.2.3 **PlantSight and APS Service Level Agreement.**

The following additional SLA Exclusions will apply to PlantSight and APS Offerings:

- (i) incidents occurring during or related to preview, pre-release, beta or trial versions of a feature; and
- (ii) incidents resulting from the use of sandbox, proof-of-concept, development, quality analysis, or other non-production systems unless explicitly included or authorized by Siemens.

5.2.4 **Regular Maintenance Window for PlantSight, APS and SIMATIC AX Offerings.**

Customer will be given notice of Regular Maintenance Windows which will be used to apply required patches to the IT infrastructure to ensure the continued security, availability and performance of the system. Anticipated scheduled maintenance will occur no more than once per month and Cloud Services will be unavailable for no more than 12 hours. The exact timing of the maintenance should (in general) be outside of regular business hours for Customers located in time zones of Central Europe and the lower 48 states of the United States of America.

5.2.5 **Uptime Support Measures.**

Section 4 of the Cloud Support and Service Level Framework does not apply to SIMATIC AX Offerings.
