

Training for Spectrum Power™ Users

Siemens offers a broad set of courses developed specifically to train users on the Spectrum Power™ System. Our training programs utilize a hands-on approach integrating a role-based methodology throughout the curriculum. Flexibility is a key aspect of the Siemens training philosophy. Our training offering is balanced against budgets, schedules, and personnel parameters and we can always accommodate for your individual needs.

Training Programs

- Operator Monitoring and Control
- Software Maintenance and Enhancement
- System Administration
- Database and Display Maintenance
- Specialty Applications
- Situational Based Trainings

Learning methods

- **Classroom** - Instructor-led training session in a classroom
- **Remote** - Live instructor-led training sessions using online-conference tools
- **On-site** - Instructor-led training sessions at your facilities
- **E-Learning** - Pre-recorded training sessions available on demand
- **Blended learning** - A combination of e-learning and instructor-led training
