Overview

2024 PLM Components Innovation Conference

It's where Siemens comes together with customers, partners and analysts to explore the wide range of applications and opportunities for our open portfolio of PLM Components to assure success for our software vendor ecosystem and its end-users.

Key conference objectives:

Learn how established software vendors and start-ups use PLM Components to deliver leading solutions

Discover innovation in design, manufacturing, simulation, robotics, cloud/mobile, and interoperability

Network with an outstanding line-up of industry experts, CxOs and product development leaders

2 

Days

Technical content, professional networking and Siemens' hospitality

27 

Sessions

Product direction, customer success and industry/technology trends

150 

Attendees

Product and industry experts, customers, partners & analysts

Register today
