

# SIEMENS

# Advance **your** career

Transform  
the everyday  
with us

We build technology with purpose. In the United States, our over 45,000 employees are transforming the everyday by pioneering more agile and productive factories, more intelligent and resilient buildings and power systems, and more reliable and sustainable transportation. The industries and infrastructure we support form the backbone of America's economy and, by combining the real and the digital worlds, Siemens is helping solve the world's biggest challenges, improve lives, and leave our planet stronger for future generations.

At Siemens, you will discover a company that empowers all employees to develop and advance in their careers, and one that is fully committed to the values of inclusion to fuel creativity and foster a sense of belonging companywide. So, if you are interested in building a better tomorrow, consider applying to one of our development programs.

Development Program	Participating Organizations	Program Description	Full-time/ Internship	Preferred Majors		Locations
<b>Electrification &amp; Automation Internship Program (*)</b>	• Siemens Industry Smart Infrastructure – Electrification & Automation	Provides you with exposure to support our portfolio of protection and automation products and solutions through a variety of engineering and business opportunities across the division including project design, product development, operations, and business analytics.	• Internship	• Business Analytics • Electrical Engineering • Finance • Industrial Engineering	• Marketing • Mechanical Engineering • Mechatronics	• Wendell, NC
<b>Power Protection &amp; Automation Engineering Development Program</b>	• Siemens Industry Smart Infrastructure – Electrification & Automation	Provides you with a structured learning and development program including a total of 4-months of instructor lead training divided into 3 parts, with two 4-month hands-on learning rotations in between around power protection and automation solutions.	• Full-time (12-month rotation)	• Electrical Engineering • Power / Energy Systems Engineering		• Wendell, NC
<b>Grid Software Internship Program (*)</b>	• Siemens Industry Smart Infrastructure – Grid Software	Provides exposure to how Grid Software connects the physical and the digital world with an integrated OT and IT landscape from planning through operations to maintenance – following its design principles of modularity, openness, user-centricity, interoperability, and resilience.	• Internship	• Computer Engineering • Computer Science • Electrical Engineering	• Power Systems / Energy Engineering	• Minnetonka, MN • Remote
<b>Smart Buildings Products Internship Program (*)</b>	• Siemens Industry Smart Infrastructure – Buildings	Provides exposure to our portfolio of smart building and fire safety technologies through opportunities in supply chain management, software development, and R&D, including roles in process optimization, digital innovation, product engineering, and system testing.	• Internship	<b>Software Internships:</b> • Computer Engineering • Computer Science • Industrial Engineering • Mechanical Engineering • Software Engineering	<b>Quality &amp; EHS and Supply Chain Management:</b> • Industrial Engineering • Manufacturing Engineering • Mechanical Engineering	• Buffalo Grove / Chicago, IL • Parsippany, NJ
<b>Software Engineer Internship Program (*)</b>	• Siemens Industry Smart Infrastructure – Brightly Software	Provides hands-on experience working with top engineers and product teams to develop and support ambitious software products, ideal for passionate Computer Science students eager to grow their skills.	• Internship	• Computer Engineering • Computer Science		• Remote
<b>Cloud / SRE Engineer Internship Program (*)</b>	• Siemens Industry Smart Infrastructure – Brightly Software	Provides hands-on experience managing and configuring SQL Server databases in a hybrid cloud environment, including data security, backup implementation, process automation, and staying current with database technologies.	• Internship	• Computer Engineering • Computer Science		• Remote
<b>Software Functional Internships</b>	• Siemens Healthineers	Project-based internship opportunities in software / computer science functions, not directly tied to Leadership Development Programs. Bachelor's and Master's degree levels.	• Internship	• Computer Engineering • Computer Science		• Issaquah, WA • Palo Alto, CA
<b>eMobility Experience Program</b>	• Siemens Industry Smart Infrastructure – eMobility	Provides you with exposure to our groundbreaking electric vehicle charging ecosystem solutions that are shaping the EV charging market and revolutionizing the landscape of safe and sustainable infrastructure.	• Internship • Full-time (24-month rotation)	• Computer Engineering • Computer Science • Electrical Engineering	• Mechanical Engineering • Software Engineering	• Atlanta, GA • Raleigh, NC (Full-time only)
<b>Engineering Leadership Development Program</b>	• Siemens Industry Smart Infrastructure – Electrical Products	Gain hands-on engineering experience with our portfolio of low-voltage power distribution and power management technology. Work on projects such as R&D, product development, product management, market strategy, system implementation, or order engineering.	• Internship • Full-time (24-month rotation)	• Computer Engineering • Computer Science • Electrical Engineering • Mechanical Engineering		• Bellefontaine, OH • Broken Arrow, OK • Grand Prairie and El Paso, TX • Hingham, MA • Peachtree Corners and Tucker, GA • Juarez and Monterrey, Mexico
<b>General Engineering Functional Internships</b>	• Siemens Healthineers	Project-based internship opportunities in engineering functions, not directly tied to Leadership Development Programs. Bachelor's and Master's degree levels.	• Internship	• Biomedical Engineering • Electrical Engineering • Industrial Engineering • Mechanical Engineering • Mechatronics • Systems Engineering		• Austin, TX • Cary, NC • Hoffman Estates, IL • Issaquah, WA • Knoxville, TN • Palo Alto, CA • Tarrytown, NY • Walpole, MA • Several other locations

# Siemens Development Programs

\* No relocation

Development Program	Participating Organizations	Program Description	Full-time/ Internship	Preferred Majors		Locations
<b>PhD Research Internships</b>	• Siemens Healthineers	Project-based internship opportunities in research & development or lab functions and teams.	• Internship	• Biomedical Engineering • Biophysics • Chemical Engineering • Computer Science	• Nuclear Pharmacy • Physics • Physical / Analytical Chemistry	• Hoffman Estates, IL • Knoxville, TN • Malvern, PA • Princeton, NJ
<b>R&amp;D Leadership Development Program</b>	• Siemens Healthineers	<b>Engineering Track</b> - Develops a well-rounded understanding of product development in areas of mechanical engineering, electrical engineering, systems engineering, system and software architecture, engineering process and tools and user interface design. Bachelor's and Master's degree levels. <b>Assay Development Track</b> - Develops a well-rounded understanding of the development of in vitro diagnostic assays from the concept phase to commercialization and product support, implementing a range of interdisciplinary skills and processes. (PhD)	• Full-time (24-month rotation)	<b>Engineering Track:</b> • Biomedical Engineering • Computer Science • Electrical Engineering • Mechanical Engineering • Software Engineering • Systems Engineering	<b>Assay Development:</b> • Bioinformatics • Biomedical Engineering • Biophysics • Chemical Engineering • Physical / Analytical Chemistry	• Mishawaka, IN • Newark, DE • Tarrytown, NY • Walpole, MA
<b>Mobility Movers Internship Program</b>	• Siemens Mobility	Participants will have an opportunity to learn about the rail industry and gain practical on-the-job experience related to manufacturing, project management, engineering, etc.	• Internship	• Electrical Engineering • General Engineering • Industrial Engineering	• Mechanical Engineering • Project Management • Supply Chain / Logistics	• Alpharetta, GA • Lexington, NC • Pittsburgh, PA • Sacramento, CA
<b>Mobility Development Program</b>	• Siemens Mobility	Participants will gain exposure to product development, application development, R&D, and other functions such as project management, operations, and procurement, in the rail transportation industry.	• Full-time (24-month rotation)	• Computer Engineering • Computer Science • Electrical Engineering • General Engineering	• Mechanical Engineering • Software Engineering • Systems Engineering	• Jacksonville, FL • Louisville, KY • New York, NY • Pittsburgh, PA • Sacramento, CA
<b>Operations Leadership Development Program</b>	• Siemens Industry Smart Infrastructure – Electrical Products	Gain hands-on experience with manufacturing operations and engineering at one of our production plants for low-voltage power distribution and power management products. Work on projects such as production planning, quality process control, digitalization and automation, fabrication and assembly, data analytics, Environmental Health and Safety (EHS), and supply chain management.	• Internship • Full-time (24-month rotation)	• Industrial Distribution • Industrial Engineering • Manufacturing Engineering	• Mechanical Engineering • Supply Chain Management	• Broken Arrow, OK • Fort Worth and Grand Prairie, TX • Hingham, MA • Pomona, CA • Roebuck, SC
<b>Operations Leadership Development Program</b>	• Siemens Healthineers	Provides you with the ability to learn the application of Lean Six Sigma tools and apply these skills to improve the business strategy for manufacturing, distribution, supply chain, and procurement.	• Internship • Full-time (24-month rotation)	• Automation or similar • Biochemistry / Biology • Biomedical Engineering • Chemical Engineering • Distribution Management • Electrical Engineering	• Industrial Engineering • Mechanical Engineering • Molding Engineering • Operations / Materials Management • Supply Chain Management	• Elkhart, IN • Mishawaka, IN • Newark, DE • Walpole, MA
<b>Atlas Graduate Program</b>	• Siemens Industry Software	A pipeline of new talent, straight from campus, to jump into the development of Calibre Design Solutions – a platform of tools that provides Integrated Circuits (IC) verification and Design for Manufacturability (DFM) optimization for Electronic Design Automation (EDA).	• Full-time	• Computer Engineering • Computer Science • Electrical Engineering		• Fremont, CA • Wilsonville, OR
<b>Strategic Student Program</b>	• Siemens Industry Software	Strategic Student Program (SSP) provides a structured and well-rounded program experience for students across all teams at Siemens Industry Software, including professional workshops, opportunities to network with executives, social events, and more. Technical training varies by team.	• Internship	• Business (Marketing) • Computer Engineering • Computer Science	• Electrical Engineering • Mechanical Engineering	• Charlotte, NC • Cincinnati, OH • Fremont and Costa Mesa, CA • Huntsville, AL • Livonia, MI • Wilsonville, OR
