

Juan Cantu

National Operations Manager
Siemens Smart Infrastructure

Juan Cantu joined Siemens in 1997 and has been National Operations Manager for Siemens Smart Infrastructure since December of 2019. He is responsible for supporting service operations in the delivery of strategy for Siemens Smart Buildings, combining effective utilization of resources in energy efficient buildings with the experience of a building that responds to its occupants' needs. Prior to that, he held successive operations and management positions within the company, most recently as the Pacific Zone Service Operations Manager, managing over 500 employees delivering fire and life safety, automation, security, energy, and low and medium voltage services to a diverse customer portfolio from healthcare, K-12 and higher education, to industrial and life sciences.

Through six years of service in the United States Navy's Nuclear Power Program, Juan continued his education in the field of nuclear energy including a hybrid of classroom education, hands-on training, and nuclear power plant operations. With over 23 years of industry experience within Siemens, Juan has focused his career on energy and sustainability, becoming a Certified Energy Manager. He is currently based out of Seattle, Washington.
