## Background

Frances Evans is Senior Vice President of Integrated Electrical Systems for Siemens Digital Industries Software, a business unit of Siemens Digital Industries. She and her team are responsible for developing and delivering Capital software, a portfolio of solutions that enable Electronic / Electrical Systems Development in large complex products. This includes support for architecture, electrical, harness, networks and embedded software design.

Frances has been with Siemens for over 25 years. She primarily worked on Teamcenter software in various past roles including as chief architect of the Unified Architecture, head of Teamcenter Applications Architecture, head of Teamcenter User Experience, Technical Advisor to the SVP and head of Product Management and Product Marketing. Frances also led the R&D integration of Polarion software into the Siemens portfolio.

Frances enjoys collaborating on company-wide initiatives and has served on the Siemens Digital Industries Software UX Council, the Architecture and Technology Council and the Patent Committee. Frances holds a bachelor's degree in Mathematics from the University of Cambridge, and master's degrees in both Applied Mathematics and Physical Oceanography from the University of Washington. She holds three patents. Frances is based in Seattle, Washington.
