

# Industrial Edge to Siemens Opcenter

Level 1  
Overview

Level 2  
Detailed

- 1 Connect vendor agnostic shopfloor equipment to Industrial Edge via pre-configured connectors
- 2 Stream events, AI inference results, energy and performance data from edge apps into Opcenter through Connect MoM
- 3 Bind PLC parameters to work order operations through the Automation Gateway via OPC UA for runtime data acquisition
- 4 Orchestrate execution, quality, planning, and intelligence across the enterprise with the Opcenter MoM portfolio
