

## | Environment, Health & Safety Policy

Siemens Limited, India is committed to advancing environment protection and sustainability measures, promoting the wellbeing of its people and ensuring a safe working environment based on six guiding elements of our Environment, Health and Safety (EHS) Management system\*

**We @ Siemens Limited are responsible and accountable for:**

- Integrating EHS aspects into manufacturing, project management processes and services, and commit to continual improvement of the EHS performance including leveraging digitalization and technology
- Implementing measures for Environment protection, waste management, prevention of pollution and carbon footprint reduction
- Physical and psychosocial wellbeing of its people, by implementing sustainable and well-defined Health Management systems
- Ensuring that our products, services and processes are controlled or influenced during its entire life cycle stage as appropriate
- Deploying competent employees, suppliers and contractors with periodic evaluation of their EHS performance
- Fostering the safety culture by enhancing competency and effective risk assessment and its mitigation by implementing proactive corrective and preventive measures
- Fulfilling EHS compliance obligations and requirements from interested parties
