Select from a variety of formats to maximize your savings and easily earn your continuing education units.

Why choosing Siemens Grid Software University?

Siemens Grid Software University (GSW-U), a trusted leader in providing continuing education units (CEU), with many years of expertise providing cutting-edge education to a range of professionals.

We offer a range of courses designed to enhance your skills and advance your career. Our courses are eligible for Continuing Education Units (CEUs) and Professional Development Hours (PDHs), ensuring that you receive the recognition and credits needed to meet your professional requirements.

Continuing Education Credits

- + A CEU is the nationally recognized unit for recording participation in professional development and noncredit educational programs
- + A CEU typically represents 10 hours of class attendance

Professional Development Hours

- + PDH is the continuing education unit of measure used by Professional Licensed Engineers (PE) to maintain licensure requirements
- + Participants earn one PDH for each one hour of instruction
- + PDH courses cover key engineering topics, including technical skills, ethics, and professional development.
- + These courses help engineers stay updated with industry standards and advancements, ensuring their expertise and professional growth.
