

# AI Suite on Industrial Edge

Level 1  
Overview

Level 2  
Detailed

1 Connect vendor agnostic shopfloor equipment to Industrial Edge via pre-configured connectors

2 Run AI and industrial apps on Industrial Edge, use case agnostic – vision, time-series or batch data inference

3 AI Asset Manager running on an Industrial Edge (virtual) device, acting as the One Stop Shop for all AI related activities. AI solution management, distribution, and operations

4 Package and Validate AI models with the Siemens AI SDK in cloud or on-prem environments
