## Message from the CEO

## Improved result, growth in two out of three business segments

Revenue for the quarter was at the same level as the same period last year, while adjusted EBITDA reached 101.6 MNOK, a growth of 11.2 percent compared to the same quarter last year.

The third quarter was characterized by continued softness in our core markets, in particular at Vinmonopolet in Norway, and decline in segments where we operate (e.g. aquavit Denmark). In spite of this context, we managed to create organic growth in two out of three segments.

The progress for the distribution business continued during the third quarter. Full effect from a new major contract in Q2, increased horeca-sales and continued high focus on costs, took adjusted EBITDA to 3.8 MNOK, +2.0 MNOK vs. LY. Distribution has now improved its adjusted EBITDA year-on-year for eight consecutive quarters and achieved its highest market share since December 2013.

Wine achieved organic growth driven by increased sales in Finland and DFTR. Norway maintained its market share, while Sweden lost market share at Systembolaget due to continued weakness of red wine bestsellers, partly off-set by higher horeca sales.

For spirits, organic growth was negative, as Arcus' sales in non-monopoly countries were lower in Q3 than last year, mainly due to destocking. In Sweden and Norway, however, we achieved sales growth in relatively soft markets.

First nine months, our overall top line growth was soft. However, we are pleased to see our margins holding up well in competitive markets.

Kenneth Hamnes
Group CEO

## OPERATING REVENUE

Total operating revenue for Wine was 377.0 MNOK for the third quarter, compared to 365.7 MNOK Q3 last year.

Organic growth was 0.8 percent, driven by Finland and DFTR. Reported growth was 3.1 percent as Q3 '16 revenues were reduced by a re-classification effect of 7.7 MNOK.

In Finland, Arcus' sales to Alko increased by 3.2 percent versus last year, while sales to horeca grew by 12.8 percent.

In Norway, sales were flat compared to last year, in line with sales out of Vinmonopolet.

In Sweden, Arcus' sales to Systembolaget in the third quarter were down 2.5 percent compared to the same quarter last year, in a market that increased by 1.5 percent. Lower sales of red wine best-sellers reduced the sales, while sales to horeca grew by 10.9 percent.

Sales of own brands in the DFTR channel grew strongly from a low base, which combined with
increased distribution in Sweden and Finland led to faster growth for own brands than the overall portfolio.

## EBITDA

The adjusted EBITDA-margin for Wine was 16.1 percent in the third quarter compared to 14.5 percent in the same period last year.

Underlying margins for the business were in line with the same period last year. The improvement in the reported margin is mainly due to a release of provisions.

## WINE

Arcus is the largest importer of wine in Norway, the second largest in Sweden, and the third largest in Finland. Arcus Wine imports and markets agency wines, as well as Arcus brands. This includes Falling Feather, Norway's best-selling red wine in 2016 and YTD 2017.

## OPERATING REVENUE

Total operating revenue for Spirits third quarter 2017 was 207.1 MNOK, compared to 215.3 MNOK for same period last year, a negative growth of 3.8 percent. Organic growth for external sales was negative 8.8 percent.

The acquisition of the remaining 50 percent of the joint venture Det Danske Spiritus Kompagni A/S 1 January 2017, and the Dworek brand 1 September 2016, contributed positively.

Sales in non-monopoly countries decreased strongly in Q3 compared to last year. A key reason for the decrease vs. last year was destocking in Denmark and DFTR, as well as continued low Danish-German border sales due to long lines at the border following stricter immigration controls. In Germany, sales from our distributor to customers were flat vs. year ago, while our sales to the distributor were down due to high stock-building last year. Sales to the USA were also lower than Q3 '16, as last year was boosted by the pipefill volume related to the national listing of Aalborg.

Sales increased in the monopoly countries Sweden and Norway. In Norway, aquavit sales increased vs.
last year in a category that continued to outperform the rest of the spirits market.

The decrease in 'Other revenue' of 3.1 MNOK compared to Q3 2016, is mainly due to reduced external bottling services.

## EBITDA

The adjusted EBITDA-margin for Spirits was 18.4 percent for Q3 2017, compared to 20.3 percent Q3 2016. The main reason for the reduced margin is the effect of lower sales on fixed costs.

## SPIRITS

Arcus is a global leader in aquavit with brands such as Gammel Opland, Linie, Løiten and Aalborg. Other important categories are bitter (Gammel Dansk), vodka (Vikingfjord, Kalinka, Amundsen and Dworek) and cognac (Braastad). Key markets are Norway, Denmark, Sweden, Finland, Germany and Duty Free Travel Retail (DFTR). Arcus brands are produced and bottled at Gjelleråsen, outside Oslo.

## Distribution: Continued profitable growth

VOLUME
Distributed volume in third quarter was 10.8 million liters, equal to same quarter last year. Positive volume-effects from a new contract implemented in second quarter, and an increase of 11 percent in distributed volumes to horeca, contributed to the growth despite a soft market. At the end of the third quarter, Distribution had a market share of 45.3 percent of volume delivered to Vinmonopolet, compared to 44.2 percent same period last year, the highest share achieved since December 2013.

## OPERATING REVENUE

Operating revenue increased by 6.3 percent in the third quarter to 67.9 MNOK, compared to 63.8 MNOK in the same period last year. Higher sales to the horeca-market, and increased income from storage and other services drove the increase.

## EBITDA

Adjusted EBITDA in the third quarter was 3.8 MNOK, compared to 1.8 MNOK same quarter last year. The positive effect from increased revenue more than offset the costs related to the increased production of other services and higher share of horecadeliveries.

## DISTRIBUTION

Vectura is the leading integrated logistics service provider for alcoholic beverages in Norway. Vectura serves both Arcus-Gruppen AS and external customers. Vectura is located next to Arcus' production facility at Gjelleråsen, outside Oslo.

# Financial position and other <br> information 

## CASH FLOW AND FINANCIAL POSITION

Reported net cash flow from operations before tax in Q3 was 127.7 MNOK (of which lower working capital was 36.1 MNOK). This is 5.3 MNOK higher than during the same period last year, driven by an adjusted EBITDA increase of 10.2 MNOK.

Net interest bearing debt was 817.2 MNOK (vs. 1242.4 MNOK same period last year). The significant reduction is mainly due to the refinancing and reduction of long-term debt, using parts of the proceeds from the IPO.

This company was recognized as though they had been wholly owned, but with partial presentation of the non-controlling interests. Partial presentation of non-controlling interests means that the non-controlling interests' share of the profit for the year is shown in the statement of income, whereas no non-controlling interests were stated in the equity statement. The transfer refers to the non-controlling interests' share of the profit for the year, adjusted for the dividend distributed for the period.

As a result of the IPO on December 1st 2016, the put option was triggered, and the Group aquired the remaining shares during Q1 2017.

Liabilities measured at fair value, categorized at level 3 in the fair value hierarchy, was at the beginning of the year 2017 related to two factors:

1. Options for the purchase of non-controlling interests in Excellars AS (9,9\%).
2. Issuance of synthetic options in the share program for selected former and current executives in the Group.

## Options for the purchase of non-controlling interests:

The liabilities related to options for the purchase of non-controlling interests is estimated on the basis of pricing mechanisms that underlie the purchase agreement and shareholder agreements, discounted to the balance sheet date. The main parameters of price mechanisms share value development measured by EBIT (earnings) until the estimated due date, multiplied by a multiple based on the Groups earnings in total. As a basis for EBIT, the Group's budgets and long term plans towards expected maturity date is used.

During Q1 2017, the Group purchased the remaining 9,9\% of the shares in subsidiary Excellars AS, increasing shareholding from $90,1 \%$ to $100,0 \%$. The balance sheet contains no remaining liability.

Synthetic shares and options in the share program:
The synthetic options are valued using the Black \& Scholes-model and will from settlement entail payments equal to any value per share beyond the exercise price multiplied by the number of synthetic options.

In relation to Arcus ASA's introduction on the Oslo Stock Exchange during Q4 2016, most of the commitments regarding the synthetic option program was settled. The synthetic options have had no value change during Q3.
