5. Change Log

1. Introduction

1.1 SCOPE

1.1.1 DEKA STRONG, DEKA MILE, & DEKA FIT events are designed to allow ALL levels to celebrate fitness together. No matter where you are on your fitness journey, DEKA provides a global fitness test/competition/event/race for ALL levels. On the same day, in the same arena, using the same standards ALL levels come together and celebrate fitness.

1.1.2 Spartan's mission is to rip 100 million people off the couch. Since 2020 Spartan DEKA has played a key role in this mission by providing low barrier-of-entry start lines designed to celebrate fitness with ALL levels. DEKA ATLAS is a bold new step up to a higher foundation of strength training and testing.

DEKA ATLAS is a 10 zone fitness strength test designed for DEKA Affiliate locations to highlight humans who have a well-rounded strength base and strong work capacity, as well as creating an attainable goal for the world to train for.

Strength training supports longevity and quality of life and DEKA ATLAS gives people a challenging yet fully attainable fitness goal to work toward.

DEKA ATLAS is the first DEKA product that is NOT designed for all fitness levels but with proper training is achievable for most. There are two ATLAS divisions available:

- The ATLAS Foundation division is a well-rounded gamified strength test that allows competitors to attempt to conquer our foundational level test within a 30 minute time cap.
- The ATLAS Peak division is a well-rounded gamified strength test that utilizes heavier weight standards and the same 30 minute time cap. ATLAS Peak can be conquered by athletes with an exceptional level of strength.

1.2 PURPOSE

1.2.1 These Rules explain how a DEKA event should be officiated and seek to:

- a) ensure that all DEKA events are conducted in a fair and consistent manner and with a spirit of sportsmanship and integrity; and

- b) provide clear guidelines to facilitate globally standardized competition; and
- c) protect the health, safety, and well-being of competitors so far as this objective can be reasonably achieved in the sport.

1.3 VARIATIONS AND AMENDMENTS

1.3.1 DEKA may from time to time change these Rules and make further Rules in its absolute discretion.

1.3.2 The English language version of these Rules shall be controlling in all respects and shall prevail in case of any inconsistencies with translated versions, if any.

 - vi) Extension is defined as being able to draw a straight line from the ankle through the knees, hips, and shoulders on both sides of the body simultaneously.
 - vii) Competitor cannot begin the next rep until both feet are in front of the rep line (Alternating split squat jumps are not allowed)
 - viii) If the weight is dropped during a rep, you will receive a penalty (no rep) requiring the athlete to complete an additional rep.
- d) Additional Notes
 - i) The athlete must maintain physical contact with the weight all the way to the ground until the weight is in a safe state.
 - ii) Throwing or dropping the weight is not allowed.
 - iii) If the competitor chooses a lighter weight than required, they may start the zone over, but any reps completed with the incorrect weight will not be counted
 - iv) Changing the position of the weight (how it's held) can be changed at any-time during or after completion of reps
 - v) The weight can be placed on the ground at any time. If the weight is placed on the ground mid-rep that rep will not be counted.
 - vi) In the event of a physical limitation that prevents a competitor from completing alternating reverse lunge reps, all 30 reps can be completed using the same leg. Mobility or limitation must be declared upon entry into zone 1.

 - iii) Both feet are NOT required to make contact with the top of the box at the same time
 - iv) During the process of stepping or jumping off the box, both feet must make contact with the ground on the opposite side of the box the rep started on for the rep to count
 - v) A rep is counted when both feet make contact with the ground on the opposite side of the box the rep started on
- d) Additional Notes
 - i) Competitor must step or jump on top of the box, they cannot jump over the entire box without making contact
 - ii) During the process of jumping or stepping up and over the box, the competitor's body must travel over the top of the box. Positioning the body off to the side of the box during the rep is NOT allowed.
