Professional Development™

Right click on your code

1. Note, if you cannot right click with your mouse, hold SHIFT and click with the mouse
2. Let go of SHIFT and click "Add Comment"

Be specific

1. Add in enough detail that someone can understand your code just by reading the comment

Use the tutorial button for more ideas and tips

The image shows the Scratch 3.0 web interface. At the top, there is a blue navigation bar with the Scratch logo, a globe icon, and menu items: File, Edit, Tutorials, Scratch Project, Share, See Community, Give Feedback, and a user profile icon labeled 'scratch-cat'. Below the navigation bar, there are three tabs: Code (selected), Costumes, and Sounds. The left sidebar contains a vertical menu with colored circles representing different block categories: Motion (blue), Looks (purple), Sound (pink), Events (yellow), Control (orange), Sensing (light blue), Operators (green), Variables (orange), and My Blocks (red). The main workspace is a grid where a mouse cursor is visible. The right side of the interface features a Stage area with a white background and a Scratch cat sprite. Below the Stage, there is a Sprite area with a dropdown menu showing 'Sprite1', a 'Show' button, and a 'Size' field set to 100. To the right of the Sprite area is a Stage area with a 'Backdrops' list containing '1'. At the bottom of the interface, there is a 'Backpack' area.

Now, Coding is Elementary.
