

Dmytro Lider

Co-Founder

[LinkedIn](#) →

Dmytro Lider is a co-founder of Grammarly. He previously served as Head of Language Technology at Grammarly, where he focused on research strategy and technical product management for Grammarly's natural language analysis engine. Since its founding in 2009, Grammarly has grown from a subscription-based tool for students to the world's leading AI communication assistant, serving over 30 million users and 70,000 professional teams.

Previously, Dmytro worked as a software engineer and a project lead for MyDropBox, a plagiarism-detection company, which was acquired by Blackboard Inc. He believes in doing work that is energizing and joyful with team members who have a shared sense of purpose.

Dmytro holds a BA in computer science and an MS in software engineering from the National Aviation University in Kyiv. Outside of work, he enjoys traveling and making music.
