Mark Schaaf is the Chief Technology Officer at Grammarly. He leads the global engineering team, focusing on nurturing talent and developing technology to support business growth.

Mark has deep experience as an engineering leader across many stages of company building. Before joining Grammarly, Mark was the CTO at Instacart. He led an impressive engineering team that helped grow the business tenfold in four years and build the product's technical foundation ahead of the company's initial public offering. Previously, he also served as the CTO at Thumbtack and held leadership roles at Google, AdMob, and Retool.

Mark holds a BS from the University of Notre Dame.
