

Opening files

This lesson examines how to open previously-saved r/f data selections.

Selecting Open

To open a previously existing file, either:

1) Select **Open** from the Quick Access Toolbar in the top left corner of the **COMBNavigator®** window.

or

1) Select the gold tab in the ribbon menu. This will display the application menu.

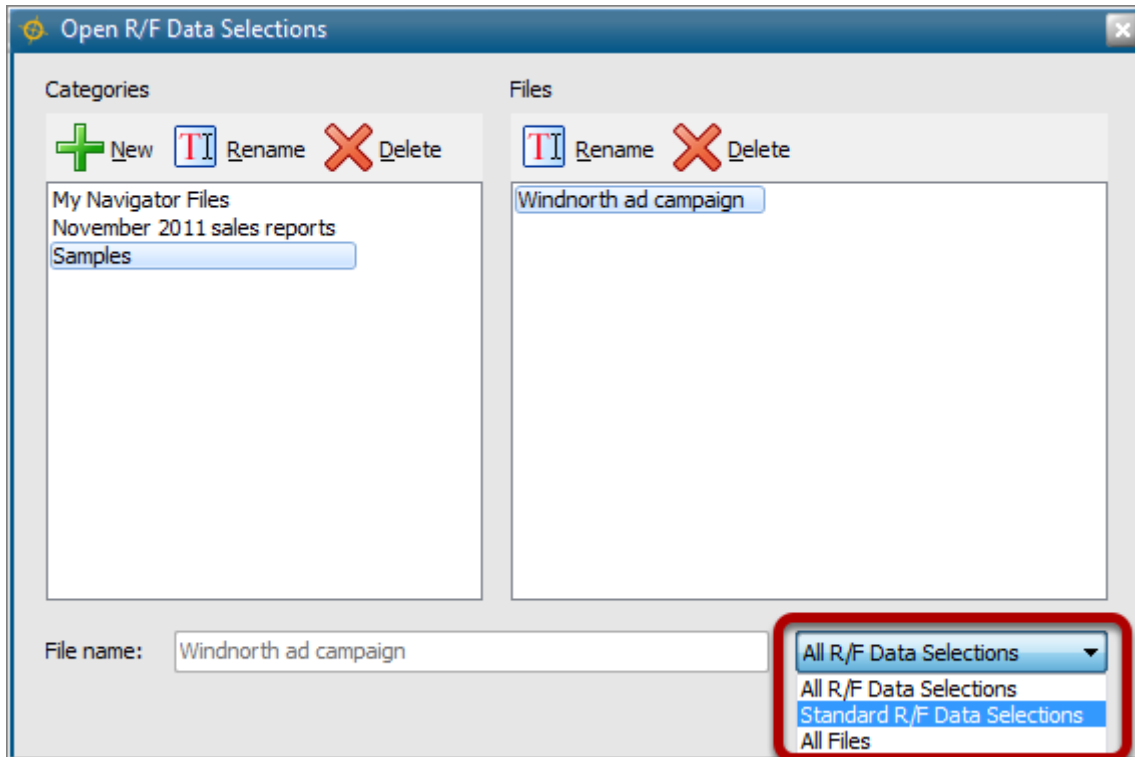

2) Select **Open**

or

2) Select **Open a Saved COMB Navigator® File**

The Navigator File Manager will appear.

(optional) Select a file type

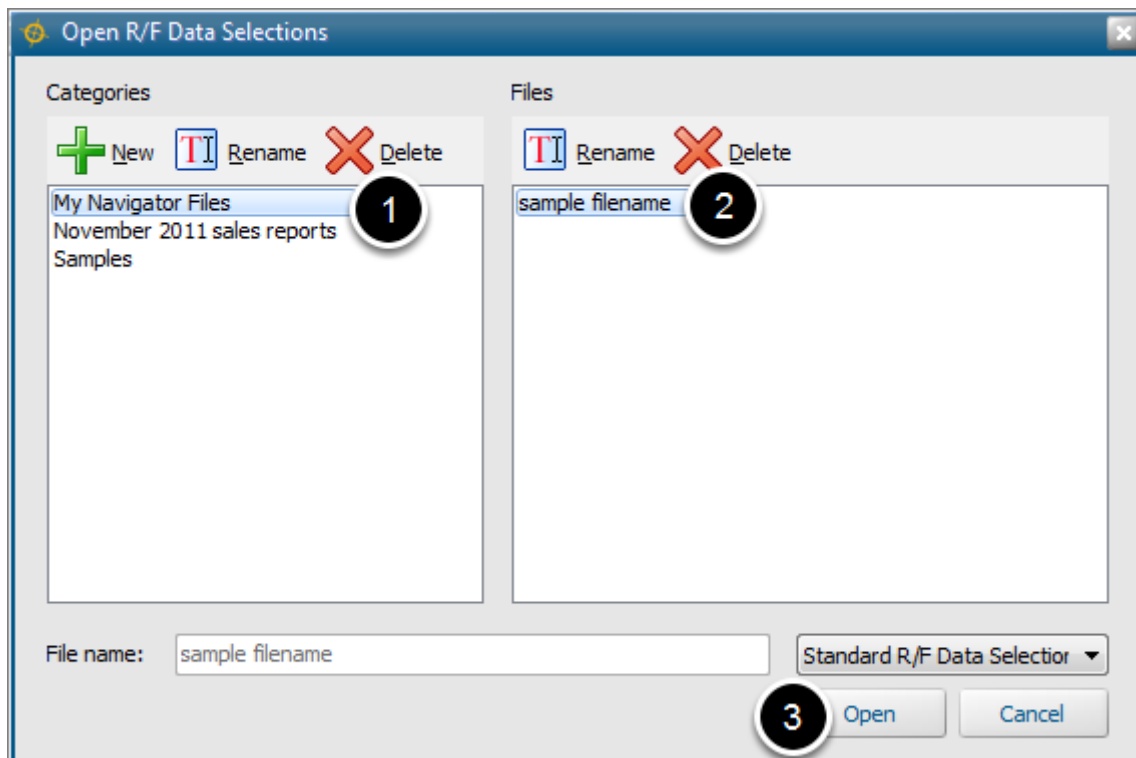

By default, file types for all Navigator reports appear in the File Manager.

To only see files of the desired file type:

- 1) Select the **File Types** box in the lower right. The drop-down list will appear.
- 2) Select the desired file type e.g. **Standard RF Data Selections**. The File Manager will close.

Select a category and file

- 1) Select a category from the **Categories** list. The files of the category will appear in the **Files** list.
- 2) Select a file in the Files list. The name of the file will be copied to the **File name** box.
- 3) Select **Open**.

Results: Filename appears in the title bar of the application

The name of the opened file will now appear in the title bar of the application.
