Vi Webinar:

Approach to Investigating Common Causes of Pelvic Limb Lameness

Date: 18 November 2026 Time: 19:30 (GMT) Online via Zoom

Build confidence in investigating pelvic limb lameness with a practical, case-based session designed to support everyday clinical decision-making.

Join Vi, in association with the BVOA, for a live, interactive webinar with Nicci Meadows BVetMed CertAVP (GSAS) MRCVS.

Through discussion and real-life case examples, Nicci will share current approaches, practical tips and guidance that can be applied in everyday practice. Attendees will develop greater confidence in recognising gait changes, carrying out an orthopaedic assessment and selecting appropriate diagnostic investigations.

Webinar agenda:

- Lameness and gait assessment
- Orthopaedic examination techniques
- Diagnostic planning and investigation
- Common causes of pelvic limb lameness
- Real-life clinical cases

Meet the speaker

Nicci Meadows BVetMed CertAVP (GSAS) MRCVS

Nicci graduated from the Royal Veterinary College in 2006 and spent six years in general small animal practice. After completing her RCVS Small Animal Surgery certificate, she became an RCVS Recognised Advanced Practitioner in 2013.

Since 2015, Nicci has worked as a peripatetic orthopaedic surgeon, providing an in-house referral service to primary care practices. She has also provided locum orthopaedic surgeon cover for several large specialist referral hospitals, including the University of Liverpool Small Animal Teaching Hospital.

This webinar is suitable for veterinary surgeons, students, veterinary nurses and practice team members with an interest in pelvic limb lameness.

The 90-minute Zoom webinar includes interactive questions and a live Q&A, so we recommend joining via a laptop or desktop computer. Live attendees will receive an attendance certificate, and a recording will be available for those unable to attend.
