

— A NATIONAL CAMPAIGN

America  
is winning  
the war on  
skin cancer.

*Don't surrender now.*

Medicare is proposing **unprecedented cuts** to the funding for patient care by physicians in 2027. **The deepest hit will be to the services we use every day to find and treat skin cancer early.**

**1 in 5** Americans will have skin cancer in their lifetimes, but we know how to beat it. Caught early, the survival rate for melanoma is an incredible **99%**.

**That's why we are fighting to Save Skin Cancer Care!**
