

IEC Symposium at Global Education Day - AAD 2023

Thursday, March 16, 2023 | 2 – 6 PM CT

Ernest N. Morial Convention Center | Rooms 283/284/285

900 Convention Center Blvd, New Orleans, LA 70130

Prurigo Nodularis

Program Chairs: Sonja Ständer, Robert Bissonnette

The session is suitable for all scientists and clinicians interested in and caring for patients with prurigo nodularis (PN). This session will closely examine PN and discuss its definition, epidemiology, clinics, measuring instruments, pathophysiology including cellular and molecular novel data, the roles of Th1 to Th3 and more. The session will also focus on and review international guidelines, case examples, and novel therapies of PN.

Learning Objectives

At the conclusion of this symposium, participants will be able to:

1. Define Prurigo Nodularis and its related nomenclature.
2. Examine the pathophysiology and potential therapeutic targets of PN.
3. Discuss the diagnosis and management of PN, to include oral therapies and emerging biologics.

Program Agenda

2 – 2:15 PM	Welcome and Introductions from the IEC Robert Bissonnette, MD FRCPC MSc Montréal, QC, Canada
2:15 – 2:55 PM	What is Prurigo Nodularis? (30-minute lecture; 10 mins Q & A) Martin Metz, MD Berlin, Germany
3 – 3:40 PM	Pathophysiology and potential therapeutic targets of PN (30-minute lecture; 10 mins Q & A) Shawn Kwatra, MD, FAAD Baltimore, MD/USA
3:40 – 3:55 PM	Refreshment Break
3:55 – 4:40 PM	Management of PN including diagnosis and current therapy (30-minute lecture; 10 mins Q & A) Sarina Elmariah, MD, PhD Boston, MA/USA
4:40 – 5:20 PM	Emerging oral therapies for PN (30-minute lecture; 10 mins Q & A) Gil Yosipovitch, MD FAAD Miami, FL/USA
5:20 – 6 PM	Emerging biologics for PN (30-minute lecture; 10 mins Q & A) Sonja Ständer, MD Münster, Germany
