

ASPS 21: Continuation of Anticoagulation Therapy in the Office-based Setting for Reconstruction After Skin Cancer Resection Procedures

Electronic health records (EHRs) collect and organize notes, medication lists, and patient information using various formats. With providers also documenting this information in unique ways, this can potentially cause confusion and an increased timeline for measure mapping with DataDerm. This tip sheet can help you manage reporting requirements for performance measures and streamline standard documentation practices to allow seamless data pull into DataDerm.

The DataDerm team will work with you to connect DataDerm with your EHR to extract data. To make the process as smooth as possible, it helps to document key elements of patient care. DataDerm cannot read scanned images of any kind, including scanned images for labs, letters to physicians, pathology reports, follow-up plans, and dates. If you have scanned images with information needed for your measures, please add a note in your chart with the date and required patient information for this data to be accurately collected.

This tip sheet can assist paper-based practices in standardizing documentation practices. Keeping notes in the patient's paper chart of all documentation requirements will assist you when reporting for this measure.

ASPS 21: Continuation of Anticoagulation Therapy in the Office-based Setting for Reconstruction After Skin Cancer Resection Procedures

For all patients, aged 18 and older, document the following in your notes:

- Diagnosis of skin cancers (including in situ disease)
 - C43 – C44,
 - D03 – D04
- CPT code for patient encounter during reporting period
 - 14000, 14001, 14020, 14021, 14040, 14041, 14060, 14061 15050, 15100,15120 15200, 15220, 15240, 15260 15570, 15572, 15574, 15576 15740 40525, 40527
- Place of Service Code: 11 (office)
- Document in your notes patients for whom anticoagulant therapies were continued prior to surgery.
- If the patient is not eligible, note in the medical record if applicable:
 - Medication modification recommended by another or managing physician

Additional Tips:

- Reconstruction after skin cancer resection options may include tissue arrangement, graft, or flaps. Primary or complex linear closures are not included in this measure.
