

Treatment Pathway for Psoriasis with Phototherapy

Adults with psoriasis

Other phototherapies for generalized and localized psoriasis

Climatotherapy

- Temporary or permanent relocation to areas of the world that provide a favorable climate and natural resources that can be utilized for disease control
- Studies have shown that climatotherapy can be effective in psoriasis treatment, but the beneficial effects may be transient

Goekerman therapy

- Coal tar in combination with UVB phototherapy
- Safe and effective option for patients with severe or recalcitrant psoriasis
