

Manifesto: Our members are our power

The power of the AAD comes from within.

Our strength and our advocacy comes not just from one voice, but from the collective power of thousands of voices.

Our education is practical, and comes from the combined expertise of today's thought leaders teaching tomorrow's thought leaders.

Our progress and growth comes from the ideas of the few and the diverse opinions of many.

Our innovation comes not from technology for technology's sake — but from facilitating innovative approaches to improving patient care and dermatologists' education.

We move forward as dermatologists. Together we evolve dermatology.
