

## Social Media Comment Policy

By posting comments to this Facebook site, you agree to comply with and be bound by both the Facebook Statement of Rights and Responsibilities (found at: <http://www.facebook.com/terms.php>) and also the American Academy of Dermatology's website terms of use (<http://www.aad.org/legal-notice>) as well as the general guidelines outlined below.

Readers are encouraged to post comments on this site. Comments are a way for readers to engage in thoughtful discussion and dialogue and we welcome your participation. Please keep all posts and conversations civil and respectful. If you disagree with another posting, remember to address the ideas or topics rather than the person who posted the message. Any posts we consider personal attacks against other posting authors, commenters, or organizations will be removed at our discretion. Those who repeatedly violate the posting guidelines that are outlined on this page or the general Facebook and Academy website policies specified above will be banned from the site.

The following are among the types of comments that will usually be removed:

- Comments that contain defamatory or discriminatory statements, personal attacks or inflammatory, offensive, or otherwise objectionable language or content  
Repeated posting of identical or very similar content (i.e., spam)
- Comments that have been posted on multiple sites for inflammatory or overtly controversial purposes
- Comments or trackbacks from what appear to be spam websites or blogs
- Comments that contain advertisements or other commercial content
- Comments that contain personal information about others such as home addresses, personal phone numbers, etc.
- Comments that appear to be intended to disrupt the normal on-topic discussion (i.e., trolling)  
Trackbacks from posts or websites that do not link back to the post or website that received the trackback

We retain complete discretion to determine which comments violate our comment policy. We also reserve the right to remove and/or not allow comments from being posted.

The American Academy of Dermatology is not responsible for statements made by the author(s). Statement or opinions expressed in this activity reflect the views of the author(s) and do not reflect the official policy of the American Academy of Dermatology. The information provided in this CME activity for continuing education purposes only and is not meant to substitute for independent medical judgment of a health provider relative to the diagnostic, management and treatment options of a specific patient's medical condition.

The views expressed within posted comments do not necessarily reflect those of the American Academy of Dermatology or its affiliates.
