AAD'S DataDerm™ Recognized EHRs

Reliable and complete data from EHRs assure that the information driving DataDerm is robust, meaningful, and comprehensive. AAD's DataDerm recognizes EHR vendors for their level of integration with the platform. Recognition is offered at the Gold, Silver, and Bronze level to platforms meeting key criteria.

Program Designations & Criteria

EHR platforms that meet these criteria and apply to be recognized may use the recognition mark on promotional materials including websites, advertisements, and signage.

FULL INTEGRATION:

- Maps all required DataDerm's data elements and all measures (MIPS, QCDR, and other AAD measures)
- Uses DataDerm-specific templates (if not already implemented)
- Offers streamlined integration solution for most DataDerm users
- Participates in DataDerm pilot programs

PARTIAL INTEGRATION:

- Maps a majority of DataDerm's data elements and measures
- Has integrated with DataDerm for at least one year

INITIAL INTEGRATION:

- Map less than half of DataDerm's data elements and measures
- Process for integration is ongoing

For more details and to apply for recognition contact DataDerm:
