Off-balance sheet exposures (HKD'000)	31-Dec-20	30-Jun-20
(a) Contingent liabilities and commitments		
 Direct credit substitutes 	_	_
 Transaction-related contingencies 	4,526	8,001
 Trade-related contingencies 	66,260	2,842,406
 Forward asset purchases 	_	_
 Forward forward deposits taken 	9,620	2,422,264
 Forward forward deposits placed 	1,403,959	3,567,115
 Other commitments 	3,073,080	11,253,720
	4,557,445	20,093,506

Direct credit substitutes are mainly financial guarantees contracts that require the issuer to make specified payments to reimburse the holder for a loss incurred because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Transaction-related contingencies are performance guarantees. Trade-related contingencies are mainly issue of letters of credit and confirmed letters of credit. Other commitments represent the amounts at risk should contracts be fully drawn upon and clients default.

(b) Derivatives (Notional amounts)- Exchange rate contracts	36,926,289	27,382,418
	36,926,289	27,382,418

Derivative contracts were mainly entered into on a back-to-back basis to facilitate clients. The transactions carried out for the account of ABN AMRO Bank N.V. Hong Kong Branch are primarily to manage exchange rate risk.

(No bilateral netting arrangements)	(143,686)	(32,410)
(c) Total fair value of derivatives– Exchange rate contracts	(143,686)	(32,410)

As at 31 December 2020, there are no note issuance and revolving underwriting facilities.

As at 31 December 2020, there was no foreign currency exposures arising from structural positions.

Liquidity

Principles of Liquidity Risk Management

ABN AMRO Bank N.V. Hong Kong Branch (ABN AMRO HK) acts as a branch and funding centre for Asia Pacific and is within the core perimeter of the ABN AMRO Group N.V. (ABN AMRO Group) Liquidity Risk Management structure. ABN AMRO HK's liquidity management is subject to the governance and principles outlined in the ABN AMRO Group Liquidity Policy. These are based on and in accordance with the principles set by De Nederlandsche Bank (DNB, the Dutch Central Bank) defining the Internal Liquidity Adequacy Assessment Process (ILAAP). ABN AMRO Group sets its liquidity management in compliance with the standards of the BASEL Committee, including but not limited to full compliance with the Liquidity Coverage Ratio, the Net Stable Funds Ratio and the Leverage Ratio.

Certain elements in the ABN AMRO Group Liquidity Policy are primarily executed centrally, and apply to the local situation only indirectly, or in a global governance context. To align the local Asset and Liability Management and Treasury (ALM/T) operating model with respect to liquidity management, international governance principles have been created in line with ABN AMRO Group liquidity principles.

Liquidity (continued)

Assets and Liabilities Committee (ALCO)

The Hong Kong Asset and Liability Committee (ALCO) defines ABN AMRO HK's Risk Appetite that aligns with the overall moderate risk profile of ABN AMRO Group. Limits and checkpoints are set relative to ABN AMRO HK's regulatory and internal ratios, intercompany funding limits and counter balancing capacity, and are used to measure, monitor and manage ABN AMRO HK's liquidity risk. ALCO holds a meeting on a monthly basis (and on an ad-hoc basis, when required), to discuss and monitor funding and liquidity topics.

Assets and Liabilities Management and Treasury (ALM/T)

ABN AMRO HK Asset and Liability Management and Treasury (ALM/T) responsibilities centre on identifying, monitoring and managing balance sheet risks within internal and external requirements. ALM/T is responsible for setting up the local liquidity risk framework and the local liquidity management strategy. The framework and strategy have to be aligned with the annual Local Risk Appetite Statement process and updated accordingly by HK ALM/T. Any adjustment to the framework have to be approved by HK ALCO and relevant global business risk committees.

Liquidity Risk Monitoring and Reporting

Reporting to HK ALCO and Group ALM on liquidity indicators is performed according to the requirements formulated by Hong Kong ALCO and Group ALM. Liquidity indicators, reports and dashboards are used to monitor the liquidity position. Internal reporting is performed on the liquidity risk appetite indicators, early warning indicators, liquidity buffer and overall liquidity profile of ABN AMRO HK. The liquidity reports aim to provide adequate insight in the overall funding position. The checkpoints and early warning indicators act as a trigger, to ensure mitigation actions are taken before they exceed the defined limit or appetite.

Diversification in funding sources and tenors of funding

ABN AMRO HK maintains a diversified funding profile and sustains its proven market access. ABN AMRO HK relies on ABN AMRO Group's central funding strategy and market access to adhere to the regulatory liquidity management principle of effective diversification in sources and tenor of funding, and also maintain an ongoing presence in its chosen funding markets, to retain strong relationships with liquidity providers in order to promote effective diversification of funding sources.

All positions over 12 months are matched funded with Head Office. ABN AMRO HK manages short term liquidity up to 12 months. The maximum liquidity mismatch (contractual gap) is monitored and reported to the Group ALCO and HK ALCO via the HK ALCO Dashboard. ABN AMRO HK also manages its intraday liquidity positions and risks, meeting payment and settlement obligation when under both normal and stressed conditions. As part of its own liquidity management strategy, ABN AMRO HK holds a liquidity buffer to withstand a period of limited funding access. A contingency funding plan is in place to guide on governance in a liquidity stress situation.

Liquidity (continued)

Liquidity Buffer

In accordance with the central funding and liquidity model of ABN AMRO Group, ABN AMRO HK maintains a regulatory portfolio/liquidity buffer. ABN AMRO HK's mandated regulatory liquid assets comprise of Hong Kong Monetary Authority's Exchange Fund Bills and debt securities issued by a sovereign or central bank with an assigned credit rating of at least AA-S&P, Fitch or Aa3 Moody's.

Fund Transfer Pricing

ABN AMRO HK recognizes and applies the cost of funding based on the principle of matched opportunity rate. Interest rate risk and liquidity risk is transferred out of the business segments to the Asset and Liability Management (ALM) segment by applying the Global Funds Transfer Pricing (FTP) principles.

Liquidity Stress Testing

Liquidity stress testing plays an important part in obtaining a comprehensive view of ABN AMRO HK's liquidity risk profile. Stress tests for ABN AMRO HK are well designed and implemented, stress outcomes provide valuable information on ABN AMRO HK's liquidity profile that cannot be generated from a limited set of standardized liquidity metrics alone. Stress Testing is used to predict and illustrate the current and prospective (potential) liquidity risk impact of ABN AMRO HK of local and/or global events and development. Stress tests and scenario analyses are run regularly to understand the impact of liquidity stress on cash flows. The results are used to assess and determine ABN AMRO HK's:

- Risk Appetite
- Contingency Funding Plan
- Liquidity Management Policy
- Required size of counter balancing capacity (comprising of Head Office funding and the liquidity buffer)

Liquidity (continued)

Contingency Funding Plan (CFP)

ABN AMRO HK defines a CFP to respond efficiently and effectively to severe disruption to ABN AMRO HK's ability to fund its activities. The CFP ensures quick identification of a (potential) liquidity crisis and necessary action taking. The CFP clearly sets out the strategies for addressing possible liquidity shortfalls in emergency situations, to ensure quick identification and action taking. The CFP outlines policies to manage a range of stress events, establish clear lines of responsibility and communication, stipulates clear stages of CFP invocation and escalation procedures, proposes mitigation actions, and is regularly tested and updated to ensure that it is operationally fit for purpose.
