

roadshow booklet | 8 March 2023

Highlights Q4 2022, strong finish to the year with net profit of 354m

- Net profit supported by strong NII and low impairments, partly offset by impact of unwind of TLTRO hedge
- Mortgage book further increased, business momentum for corporate loans remained healthy
- NII up from further recovery of deposit margins and higher ALM/Treasury results; FY2022 NII above guidance at 5.5bn 1)
- Fees grew by 7% in 2022, supported by higher payment services (volumes and pricing) and good results at Clearing
- Underlying costs 2% lower than in Q3; FY2023 costs expected around 5.3bn as higher inflation and investments offset cost savings
- Credit quality remains solid, FY2022 CoR with 3- bps well below TTC CoR of 20bps, prudent buffers remain in place
- Strong capital position, with Basel III CET1 ratio of 15.2% and a Basel IV CET1 ratio of around 16%
- Final dividend of 0.67 per share proposed ²⁾, start of 500m share buyback programme (superseding the 250m conditional SBB permission)

Good progress on strategy execution; 2023 year of delivery

Steady progress on our agenda in 2022

- Mortgage market leader in new production
- Entrepreneur & Enterprise concept live in all countries
- Successful transition to 'digital first'
- Strong revenue development for Corporate banking in and outside NL reflecting successful NW-EU strategy
- CB non-core wind-down largely completed
- Climate strategy published with targets for 2030 for 4 carbon-intensive sectors and own client asset portfolio
- Simplified organisational structure implemented
- 500m share buyback announced

Focus on strategy delivery in 2023

- Income diversification from further growth in fee income
- Growth in targeted segments
- Improve NPS
- Focus on cost discipline
- Finalise AML remediation
- Increasing AML effectiveness and efficiency by risk based approach and automation

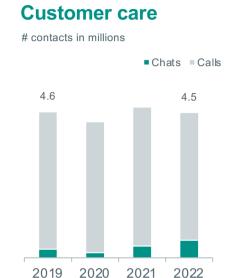

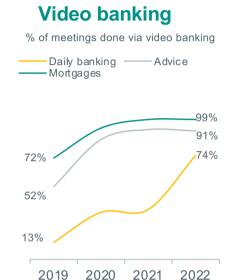

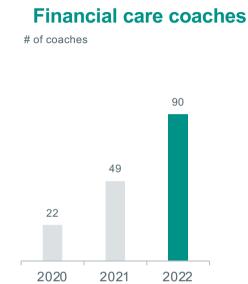

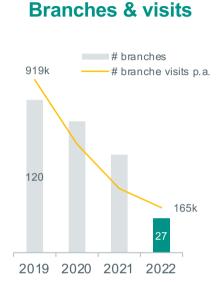

27 branches remaining reflect successful transition to 'digital first'

Personal bank in the digital age

- Extensive mobile/online functionality (including digital signing and onboarding) used by vast majority of clients
- Personal contact is available through Customer Care, video banking, financial care coaches and branches
- Customer Care is the first point of referral if clients need help or don't know how to use mobile/online
- Video banking is our primary channel to get in touch with our specialists
- Financial Care coaches; dedicated person assisting mainly elderly with their daily banking (also visiting clients home)
- Strong decline in branch visits as clients now use our other channels, enabling reduction down to 27 branches

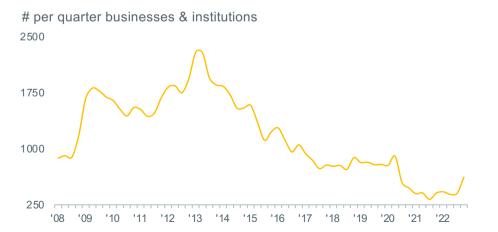

Dutch economy expected to expand modestly, housing market cooling down

Dutch economy continues to outperform Eurozone 1)

		2021	2022	2023e	2024e
Netherlands	GDP (% yoy)	4.9%	4.5%	1.2%	1.3%
	Inflation (indexed % yoy)	2.8%	11.6%	4.6%	4.1%
	Unemployment rate (%)	4.2%	3.5%	3.8%	3.9%
	Government debt (% GDP)	52%	49%	49%	49%
Eurozone	GDP (% yoy)	5.3%	3.5%	-0.2%	0.7%
	Inflation (indexed % yoy)	2.6%	8.4%	5.6%	2.3%
	Unemployment rate (%)	7.7%	6.7%	6.8%	7.2%
	Government debt (% GDP)	97%	95%	96%	95%

- Dutch economy continuous to perform relatively strong, unemployment among lowest in Europe
- For Eurozone a shallow, prolonged recession expected, with GDP contracting modestly for 4Qs as of Q4 2022
- Bankruptcies still low, but rising as government support measures phase out and high energy prices kick in
- Higher mortgage rates, lower disposable income and lower consumer confidence impact house prices (-6% 2023e and -4% 2024e) and mortgage transaction volumes (-5% 2023e and +2.5% 2024e¹⁾)

Dutch bankruptcies rising, but still historically low 2)

House price increases have come to an end 1, 2)

2) Source: CBS

Volume growth in mortgages and corporate loans during 2022

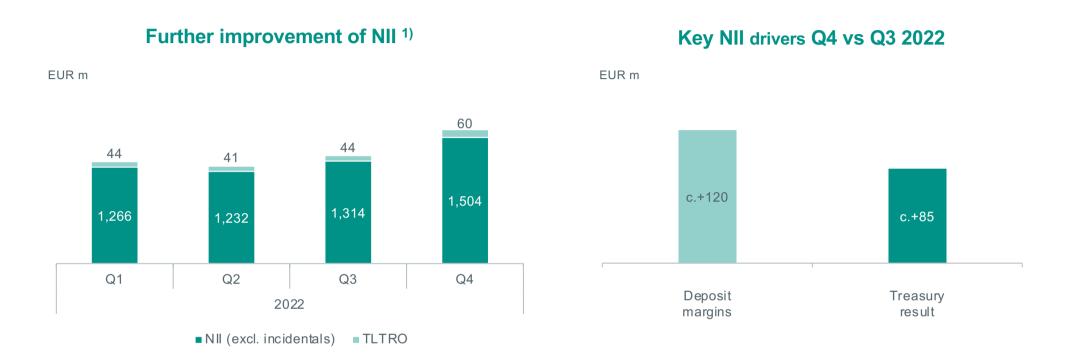

- Mortgage portfolio increased Q-o-Q despite slowdown of housing market; Y-o-Y mortgage book up by 4.4bn to 150.8bn
- Corporate loans grew by 1.9bn during the year reflecting healthy business momentum and growth in targeted focus sectors (digital infrastructure, mobility, and new energy)
- Client deposits increased Q-o-Q by 2.9bn, reflecting increasing economic uncertainty, which led to increased household saving

6

1) Excluding CB non-core

Strong recovery of NII driven by deposit margins and ALM/Treasury result

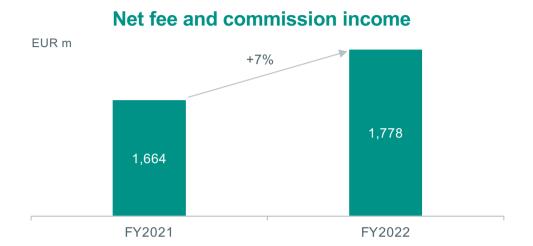

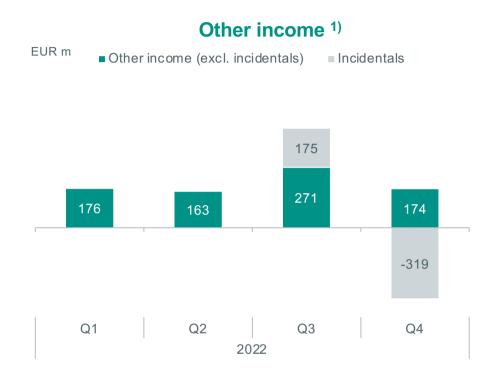

- Fourth quarter took a large step in normalisation of NII following significant ECB rate hikes, benefitting both deposit margins and ALM/Treasury results related to cash position
- ALM/Treasury result elevated reflecting unwinding of swap positions (c.35m in Q4)
- Margins on mortgage inflow below outflow. Consumer lending NII remained under pressure
- As of March 1st, savings coupon will increase by 25bps ²⁾ to 50bps, competitive forces will increasingly drive development of savings margins going forward

¹⁾ Excluding incidental in Q3 2022 of -82m; 21bn out of 35bn TLTRO drawdown repaid in Q4 2022

Fee income remained strong

- FY2022 fees increased by 7% compared to FY2021, largely driven by higher income from payment services (volumes and pricing), higher credit card usage and good results at Clearing
- Other income ex. incidentals down versus Q3, mainly related to lower volatile items (ALM/Treasury result and XVA)
- Following the change in TLTRO terms, a negative impact of 319m from unwinding the hedge is booked in Q4

Underlying costs declined, FY2022 costs in line with guidance at 5.3bn 1)

Operating expenses 1)

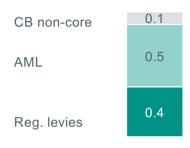

- Underlying costs declined further, mainly related to a reduction of c.600 external FTEs
- External FTEs decreased by 30% in 2022, largely related to AML
- Cost saving programs delivering further savings (c.340m since YE2020)
- Impact of new CLA in Q4 (c.30m) offset by some staff related provision releases

Cost flat FY2023, inflation & investments offset savings

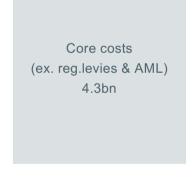

Operational expenses 1)

EUR bn

Savings >0.4bn (>40%)

- Complete CB wind-down (~0.1bn)
- Efficient AML BaU (>0.1bn)
- Lower regulatory levies (~0.2bn)

Savings c.0.2bn (c.5%)

- Cost savings exceed inflation (net ~0.1bn)
- Normalisation of strategic investment spend (~0.1bn)

5.3bn FY2022

4.7bn FY2024

- FY2023 costs expected flat vs. FY2022 at c.5.3bn
 - CB non-core and AML costs expected to come down (~0.1bn combined)
 - Regulatory levies unchanged in 2023
 - Core cost base expected to increase by ~0.1bn (impact of higher inflation and higher investments)
- Significant back end loaded cost reductions in 2024
 - Completion CB non-core wind-down and more efficient AML processes to reduce cost by another ~0.1bn vs. 2023
 - Regulatory levels expected to reduce by ~0.2bn ²⁾
 - Reduction of core costs from existing savings programs and lower investment spend
- 2024 target challenging due to increased inflation and higher investments

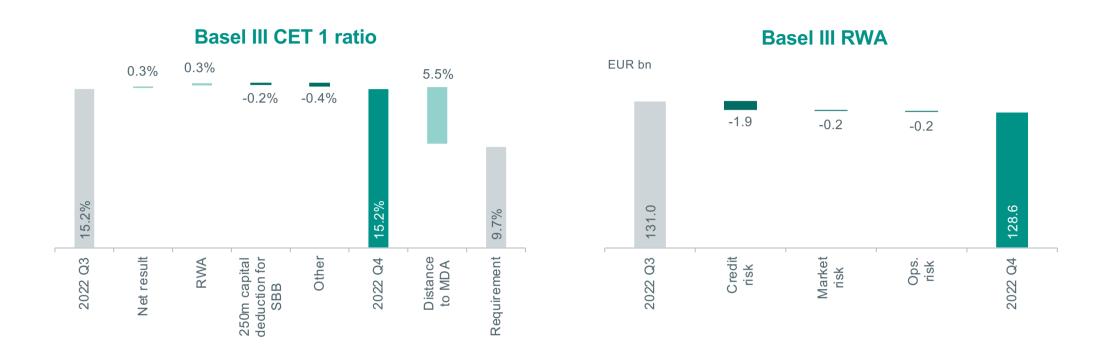

Low impairments on back of further reduction in non-performing loans

- Impairment charge of 32m, reflecting additions to stage 3, partly offset by releases in stage 1 and 2
- Releases mainly caused by adjustment in weights of macroeconomic scenarios and lowering of management overlays
- Additions to stage 3 impairments related to both new and existing defaulted clients in our corporate loan book
- Management overlays decreased by c.40m to 330m, of which almost half is related to war in Ukraine and Covid
- Further drop in non-performing loan exposure, reflecting repayments, write-offs and clients returning to stage 2

Strong capital position

- Well capitalised with a Basel III CET1 ratio of 15.2%, including 500m capital deduction for SBB (c.40bps)
- Maximum Distributable Amount (MDA) trigger level of 9.7%¹⁾, increased countercyclical buffer ²⁾ included in capital targets
- RWA decrease largely from lower credit risk RWA reflecting (seasonal) business developments
- Basel IV CET1 ratio c.16%, Basel III RWAs above Basel IV

Our long term financial targets

	Long term targets	FY2022
Return on Equity	c.8% by 2024; ambition 10% with normalised rates	8.7%

Macroeconomic scenarios to calculate credit losses 1)

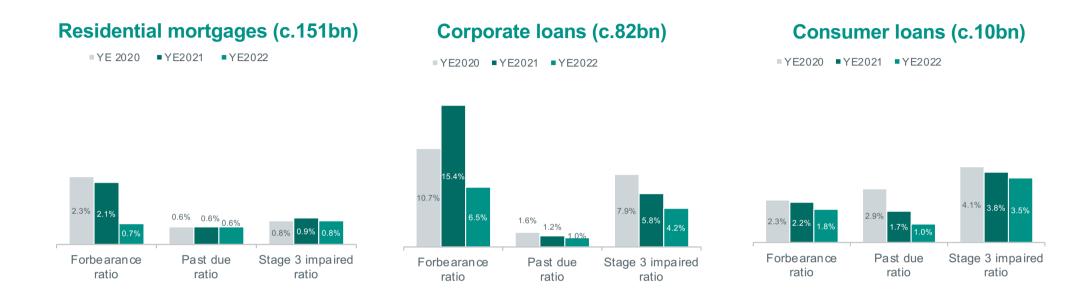

Differences Q4 2022 vs Q3 2022, no more gas/oil from Russia in base case

- Baseline now assumes no more Russian gas (was assumption for Negative and Adverse in Q3) nor for oil reflecting the import ban per 2023; impact on baseline MEVs is offset by government support package including an energy price cap
- A short (but significant) recession still expected in the eurozone, and a short but quite mild recession in the Netherlands
- In negative, on top of a complete, indefinite shut-off of Russian gas to Europe and a ban of Russian oil (products), stress from the energy sector is larger/ longer lasting compared to base case
- In positive, Dutch government continues with fiscal spending programs to reduce energy reliance on Russia and support energy transition

¹⁾ Group Economics scenarios per September 2022 used for Q3 2022, per December 2022 used for Q4 2022

Continued strong credit quality, no signs of asset quality deterioration

- Despite war in Ukraine, high inflation and end of Covid support, credit risk metrics have continued to see improving trend
- Forbearance ratios ¹⁾ came down as probation period for provided payment holidays for Covid expired for corporate loans and mortgages
- Past due ratios ²⁾ came down except for mortgages, which were stable compared to YE2021
- Decline in stage 3 impaired ratios ³⁾, for corporate loans due to repayments and to a lesser extent, write-offs as well as clients returning to stage 2

³⁾ Stage 3 impaired ratio: Shows which fraction of the gross carrying amount of a financial asset category consists of stage 3 impaired exposures

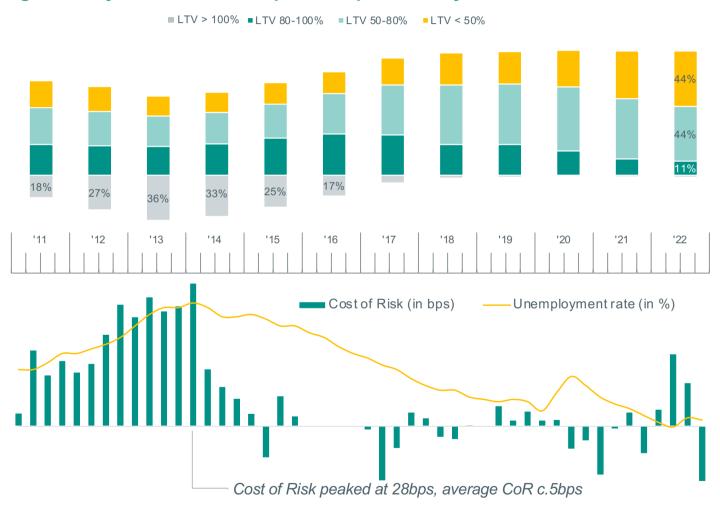

¹⁾ Forbearance ratio: Forborne exposures (resulting from certain measures applied to clients in financial difficulty) as a % of gross carrying amount, exposures stay forborne for at least two years = probation period

²⁾ Past due ratio: Financial assets that are past due (but not impaired) as a % of gross carrying amount

Mortgage portfolio significantly more resilient versus previous downturn

Significantly better LTVs compared to previous cycle

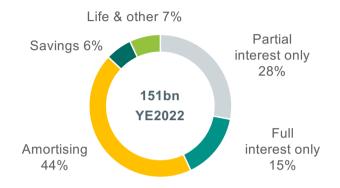

- Mortgage losses mainly materialise from combination of underwater mortgage and unemployment
- In 2013, following a 20% house price decline, over 1/3 of mortgages were under water 1)
- Today, a 20% house price decline would only lead to 11% additional mortgages under water
- Unemployment rate was almost 9% in 2013 versus
 3.5% in 2022 and expected to increase slightly next year to 4.3% ²⁾

Dutch Commercial Real Estate Portfolio as of 30/06/2022 1)

- In 2022 value of Dutch real estate increased, but interest rate increases and worsening economic outlook will put pressure on values in 2023, whereby prices of retail and office spaces will be affected more than industrial (logistical buildings)
- A recent sensitivity analysis showed that our Dutch and international CRE portfolio are deemed robust and resilient to market deterioration
- Around 90% of OOE is financed to clients with UCR 4- (sub-investment grade) or better, with UCR3- (investment grade) being dominant with 20% of the OOE ³⁾
- CRE policy in general LTV-threshold of 70%, around 95% of OOE is financed with <70% LTV

³⁾ One Obligor Exposure of 30/06/2022; please see Integrated Annual report for mapping internal Uniform Counterparty Rating (UCR) to external credit ratings

¹⁾ International CRE portfolio c.0.8bn, largely investment CRE

²⁾ Other asset types largely consists of hotels (c.3%), cafes/restaurants (c.2%) and land (c.2%)

Key points

- Decrease in Basel III CET1 ratio largely reflects increase in credit risk RWA from model add-ons and changes in the regulatory approach of models
- Increase in CET 1 capital from addition of net profit excluding dividend reservation, partly offset by 500m deduction for SBB
- Leverage ratio well above the minimum regulatory requirement of 3.0%
- Total MREL excludes c.5.4bn of grandfathered eligible senior preferred instruments outstanding at end of December 2022

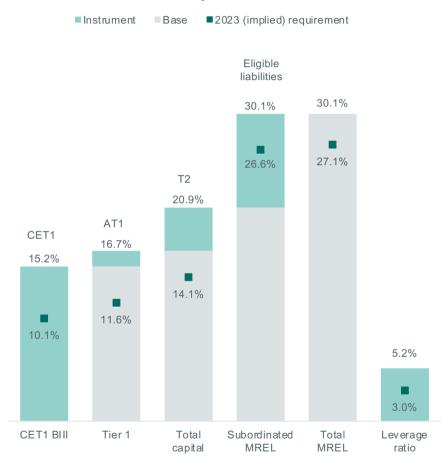

Strong capital position complemented by loss absorbing buffers

Strong loss absorbing buffers in place

- Basel III CET1 ratio well above SREP, resulting in 5.1% MDA buffer and capacity to absorb future increases in CCyB¹⁾
- AT1 at 1.5%. Based on CRD art. 104a a 0.3% shortfall exists vs. a 1.9% combined requirement ²⁾
- T2 rebalanced to 4.2% in favour of SNP, focus on maintaining T2 above 2.5%
- MREL at 30.1%, M-MDA buffer to subordinated requirement of 3.5%, focus on managing M-MDA buffer 3)
- Total MREL excludes approx. EUR 5.4bn of eligible Senior Preferred (SP) at the end of Dec 2022 4)
- Remaining 2023 issuance of capital/MREL eligible instruments expected to be in range of EUR 1-3bn
- Leverage ratio well above minimum requirement of 3%

All buffer requirements met

¹⁾ SREP is sum of: CET1 capital requirement: 4.5% Pillar 1, 2% Pillar 2 Requirement (1.125% based on 104a), 1.5% Other Systemically Important Institution Buffer, 2.5% Capital Conservation Buffer (CCyB), 0.1% Countercyclical Capital Buffer. MDA = Maximum Distributable Amount

⁴⁾ Senior Preferred (SP) issued before June 2019 with a remaining maturity of more than 1yr are eligible for total MREL. SP issued after June 2019 is not compliant with art. 72b CRR and not eligible for MREL

²⁾ Art. 104a CRD allows P2R to be with 1/4th of Tier 2, 3/16th of AT1 and the remainder by CET1

³⁾ MREL requirement to further increase in Jan 2024: subordinated requirement from 26.6% to 27.0% and total requirement from 27.1% to 27.4%

Liquidity risk indicators actively managed

Solid ratios and strong buffer

- Funding primarily through client deposits, LtD lower reflecting increased client deposits and wind-down of Corporate Bank non-core loan book
- LCR and NSFR ratios well above 100%
- Survival period consistently >12 months
- Liquidity buffer increased to 103.6bn

Liquidity risk indicators

	31 Dec 2022	31 Dec 2021
LtD	96%	103%
LCR 1)	144%	168%
NSFR	133%	138%
Survival period (moderate stress) 2)	>12 months	>12 months
Available liquidity buffer	103.6bn	101.5bn

Drivers liquidity buffer

- Safety cushion in case of severe liquidity stress
- Regularly reviewed for size and stress
- Size represents both external and internal requirements
- Unencumbered and valued at liquidity value
- Focus is on optimising composition and negative carry

Liquidity buffer composition

EUR bn, 31 December 2022

Buffer composition	EUR bn	%	LCR
Cash/Central Bank Deposits	58.6	57%	✓
Government Bonds	27.3	26%	\checkmark
Supra national & Agency	9.1	9%	\checkmark
Retained CBs	5.5	5%	
Other	3.0	3%	\checkmark

95% of the liquidity buffer is LCR eligible

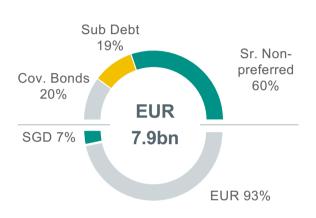

²⁾ Survival period reflects the period the liquidity position is expected to remain positive in an internally developed (moderate) stress scenario. This scenario assumes wholesale funding markets deteriorate and retail, private and corporate clients withdraw part of their deposits

^{1) 12} month rolling average

Well diversified mix of wholesale funding

Issued term funding (FY2022)

Maturity calendar term funding 1)

- Funding is steered towards a mix of funding types, markets, currencies and maturity buckets
- Strategic use of long dated covered bonds to fund mortgage origination in longer interest fixings
- Avg. maturity of 6.8yrs Q4 2022 (excluding TLTRO III of EUR 14bn at YE2022)
- Funding need for 2023 expected to be at the high end of our EUR 10-15bn usual range: main focus is on senior preferred and limited need for capital or MREL eligible instruments
- Asset encumbrance 26% at YE2022 (25% at YE2021)
